

CARLO Classic Floor Lift

Safe and Effortless Patient Transfers

Providing a High Level of **Safety and Comfort**

Characterized by a very light and stable aluminum construction, CARLO Classic supports caregiver and resident safety in daily lifting, transfer and repositioning tasks.

Featuring a 6-point carry bar that can be easily lowered to the floor for lifting residents in slip and fall accidents, the low height of the carry bar can also facilitate transfers to bathtubs and beds. Featuring an Anti-Rotation Mechanism (ARM), CARLO Classic removes any involuntary rotation of the carry bar during transfers and reduces uncomfortable swivel movements, providing the resident an extra feeling of safety.

CARLO Classic is available with a safe working load of 230 kg (507 lb) for bariatric residents with low mobility. Also available with low legs to accommodate lower beds, stretchers and furniture.

Battery and charger are backwards compatible across all Handicare by Beka mobile lifts.

Caregiver and Resident Benefits

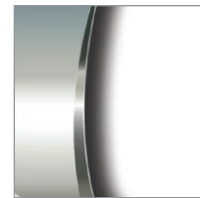

Carrybar with anti-rotation mechanism (ARM) and a free rotation area of 360°.

Cable remote control with display of the charging condition of the battery, failure diagnostics, service.

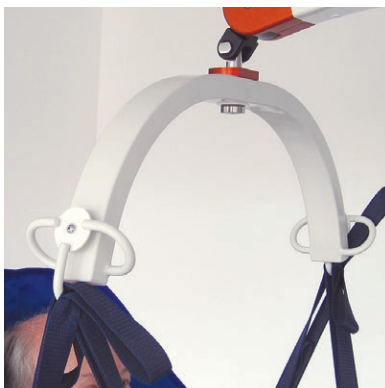

Four high-quality double castors, two of them with brakes, provide easy movement.

Light construction. Chassis, lifting column and components made of 100% aluminum.

Electrically spreadable legs with low height to pass underneath baths and beds.

Multi-purpose 6-point carrybar allows an easier and comfortable transfer of the client.

Electrical height adjustment with lowering of the carrybar to the floor. Also includes manual emergency lowering system.

Wide choice of loop slings.

CARLO Classic Floor Lift

Specifications

Safe Working Load (SWL)

CARLO Classic: 185 kg (408 lb)
CARLO Classic 230: 230 kg (507 lb)

Dimensions (L x W x H)
