Page intentionally left blank

At Arjo, we believe that empowering movement within healthcare environments is essential to quality care.

Our products and solutions are designed to promote a safe and dignified experience through patient handling, medical beds, personal hygiene, disinfection, diagnostics, and the prevention of pressure injuries and venous thromboembolism.

With 60 years caring for patients and healthcare professionals, we are committed to driving healthier outcomes for people facing mobility challenges.

Mobility Gallery

The Mobility Gallery uses colour coded icons from A to E to represent the 5 levels of functional mobility. Each level of mobility is personified in the characters Albert, Barbara, Carl, Doris and Emma.

Mobility, as well as the patients' self-reliance, largely determines the physical assistance someone needs and the physical loads (static and dynamic) on the caregivers. Reduced mobility will result in an increased need for help and eventually more equipment to assist. Without the right equipment, this assistance results in more physical loads for the caregivers.

Good quality of care not only takes the

patient's mobility into account, but also the caregivers' health. Quality of work and quality of care are linked when it comes to mobility. These icons are also used within the Mobility Classification Tool and referenced in the International Standardization Organization Technical Report 2011¹.

A Ceiling lift such as Maxi Sky 2 can also be used to support Barbara and Carl from Arjo Mobility Gallery, during

rehabilitation activities, such as repositioning in bed, sitting at the edge of the bed and ambulation. Using the ceiling lift with an ambulation sling, for example, combined with a walking frame, can offer additional support and confidence when practising walking and other therapeutic activities. This allows the therapist to focus on guiding the activity, whilst the device supports, reducing the risk for both therapist and patient.

					
	Albert	Barbara	Carl	Doris	Emma
Long term care					
Acute care					
Bariatric care					
Special care					

¹ International Standardisation Organisation Technical Report: Ergonomics: manual handling of people in the healthcare sector. TR12296 (2012)

Infection control

Healthcare-associated infections (HAIs) cause untold suffering to those affected and are a significant source of complications across the continuum of care while being associated with a substantial increase in health care costs.

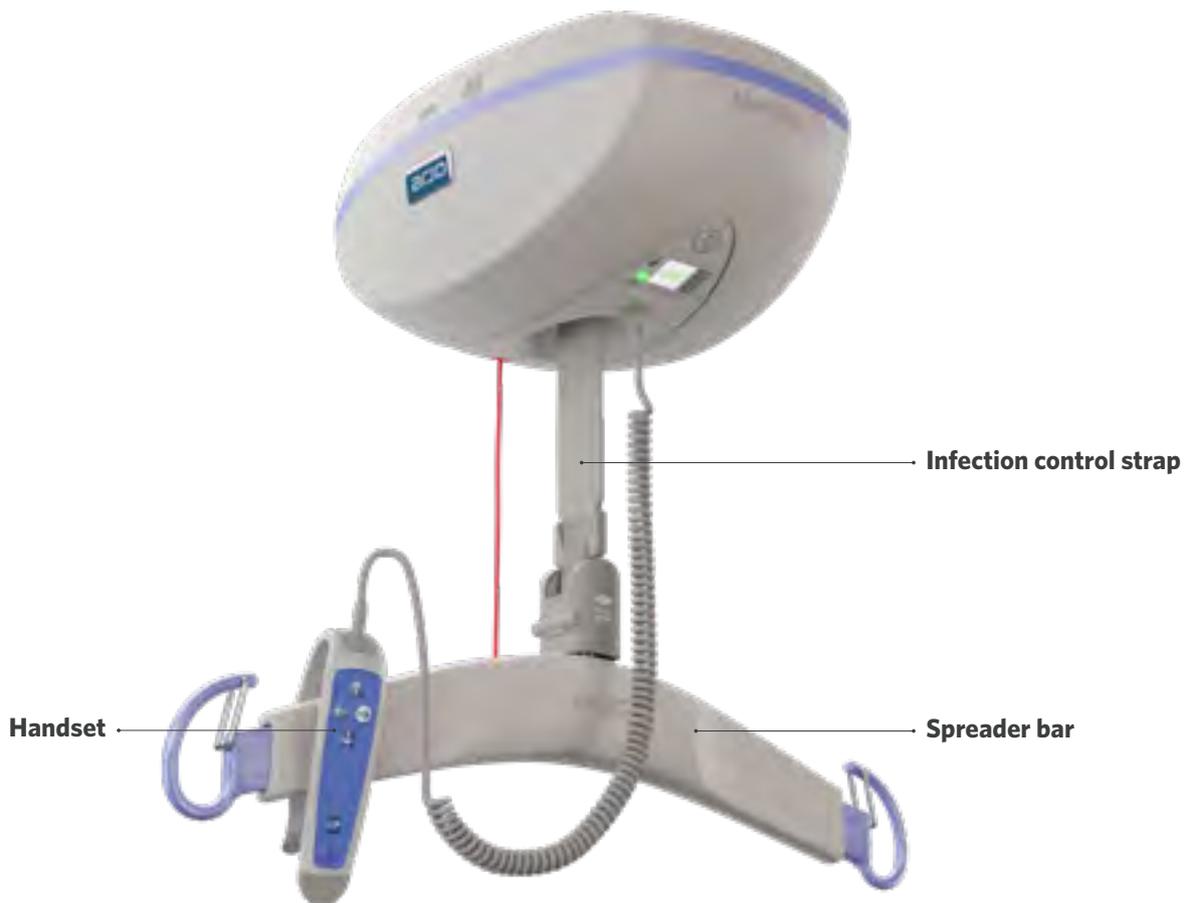

In the healthcare setting, contaminated non-critical medical devices and equipment can play a role in the transmission of potentially harmful microorganisms. Contaminated equipment is touched and microorganisms are transferred onto caregivers hands only to be transferred to another patient or device.

Regular and thorough cleaning of medical devices and equipment disrupts transmission to the caregiver and patient by decreasing the amount of microorganisms

present. This decreases the risk of infection.

While hand hygiene is the single most effective means of decreasing healthcare associated infections, the need for easy, effective cleaning and disinfection of non-critical medical devices and equipment is also important.

Conclusion: A comparison study was conducted to evaluate the effect of disinfection on two different composite materials used as straps in Maxi Sky 2® ceiling lift.

QR Codes

Visit the webpage

If you want more information about the products contained within this document, "Visit the webpage" QR Code. please point out the standard Camera application of your mobile device (iOS or Android) to scan it and follow the popup. It will lead you to the Arjo webpage dedicated to the specific product.

Example of The QR Code leads to the Arjo website

Augmented reality

Some products have a "View in AR" QR Code on their main page. You can apply the same scanning behavior with your Mobile Phone or Tablet, to see the product in Augmented Reality, at scale. Make sure the ambient light in the room is good enough, and point your device to the floor or ceiling to see the model in Augmented Reality.

Example of Arjo Floor Lifters in Augmented Reality

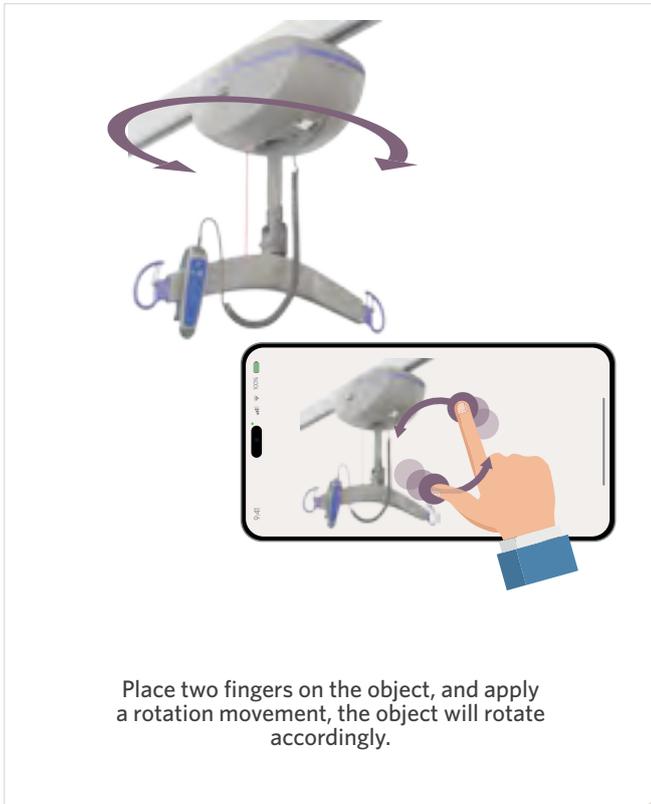

How to manipulate Augmented Reality (AR) objects

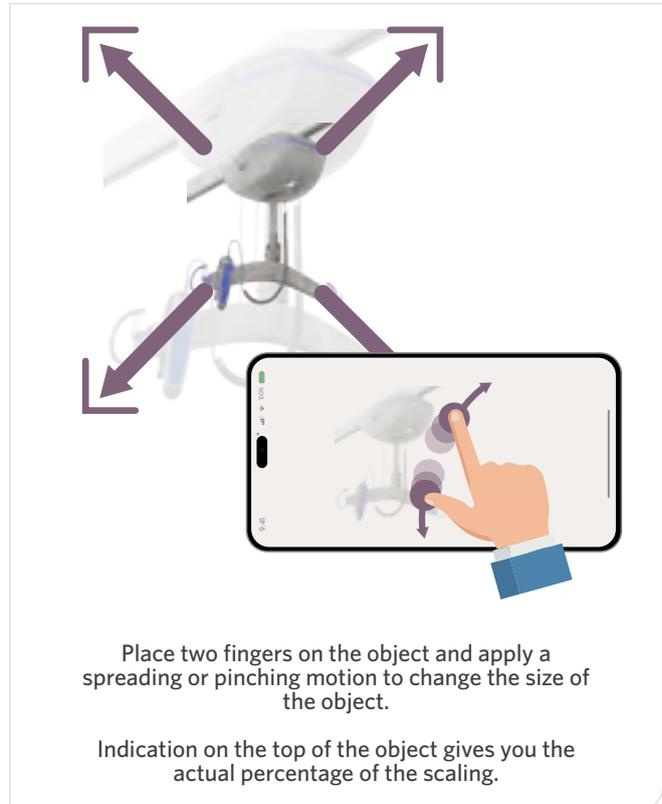

You can move around the product to see details. You can also interact with the product, using intuitive finger movements on your device screen. Thus, you can move the virtual object on a table, modify its size or apply a rotation to it, in order to place it in the correct axis to pass a door, for example.

Note that, at 100%, the virtual object is *approximately* at its real life scale.

Fixed ceiling lifts

Page intentionally left blank

CHARGING METHODS

Contact Station (C-Stat)

The ceiling lift charges only when it is connected to a dedicated charging station, located on the track path. Therefore you have to return the ceiling lift back to its charging station in order to charge.

Enhanced Charging System (ECS)

The charge anywhere along the track path solution, is more convenient but is not compatible with the KWIKtrak tracking accessories like the Turntable, Gate, or Exchanger. With embedded track installations, the ECS solution is mandatory. (See Ceiling Lift Solution Chart for ceiling lift type compatibilities)

Wall Charging System (WCS)

In the specific case of the installation of Maxi Sky 2 into certain KWIKtrak tracking configurations and competitor or legacy tracking systems, we offer the Wall Charging Solution (WCS).

It consists of a Maxi Sky 2 with an adapted trolley, and a kit, including a wall charger, an adapter and a wall hook. It is fully compatible with both straight tracks and X-Y systems, with an evolving numbers of competitor tracks.

Notes:

- For more information about compatible competitor and legacy tracks, please refer to the *Competitor and legacy* tracking section.
- For compatibilities and ceiling lift part numbers, please refer to the corresponding ceiling lifts section.

SPREADER BAR ATTACHMENT

The spreader bar features an attachment which allows the caregiver to change it in a few steps without using any tools. We propose two different options, depending on the selected ceiling lift:

Quick Connect

Ideal when interchange the spreader bar for different clinical needs, the Quick Connect systems is done in 3 simple steps.

Standard connect (Clevis pin and split ring solution)

When it is not required to interchange spreader bars frequently.

MAXI SMART

The Maxi Smart™ service is an intelligent software addition to your Maxi Sky 2 ceiling lift system. With MaxiSmart you can now maximize the usage of your lifts, increase the cost-effectiveness of your investment, ensure better usage planning and plan your resources better.

For Maxi Smart, contact your local Arjo marketing department

Infection control

Our complete range of Maxi Sky ceiling lifts is designed to integrate with your care environment, helping to ensure a safe, comfortable and dignified experience for everyone involved. The ceiling lifts are installed, stored and operated so that a single caregiver can transfer patients or residents smoothly without any manual lifting, thereby helping to reduce the risk of injury for themselves and the person in their care.

You minimise the risks and associated burdens of cross infection in ceiling lift transfers.

Supports an optimized ceiling lift cleaning and disinfection process.

Non-porous components are the lifting strap, emergency cord and spreader bar. Intuitive user interface LCD interface provides instant and clear feedback on the state of the lift.

WHAT CLEANING SOLUTIONS TO USE ?

Whenever you see this symbol in the next pages, refer to this table to find out which cleaning solutions can be used.

DISINFECTION AGENTS COMPATIBILITY				
Quaternary Ammonium	≤ 0.21% (2100 ppm)	•	•	•
Isopropyl Alcohol	≤ 70%	•	•	•
Phenolic	≤ 1.56% (15600 ppm)	•	•	•
Bleach ¹	≤ 1%		•	•
Paracetic Acid ¹	≤ 0.25%			•
Hydrogen Peroxide ¹	≤ 1.5%			•

¹ If the spreader bar cover is made of vinyl, do not use these disinfection agents.

PRODUCT INFORMATION

GENERAL	
Weight, complete (Four-function model)	12.3kg (27 lb)
Weight, complete (Two-function model)	11.6kg (26 lb)
Operating force of control	< 5 N
Lifting capacity	120kg (265 lb), 200kg (440 lb), 272kg (600 lb)
Strap length	2500 mm (98.4")
Lifting speed	5.1 cm/sec (2.0") without load 4.2 cm/sec (1.7") at 120 kg (265 lb) 3.8 cm/sec (1.5") at 200 kg (440 lb) 3.3 cm/sec (1.3") at 272 kg (600 lb)
Maximum stroke (from ceiling)	2300 mm (90.6")
Adjustable horizontal displacement speeds	10, 15, 20 cm/sec. (4, 6, 8"/sec.) Preset at 20 cm/sec (8"/sec.)
ELECTRICAL	
Duty cycle	Up/Down Motor: Max 10%, 2 minutes continuously Left/Right Motor: Max 20%, 5 minutes continuously Sit/Reclined Motor: Max 10%, 2 minutes continuously
Charging method compatible	Contact station, ECS and WCS
Horizontal axis motor	24 VDC, 62 watts
Vertical axis motor	24 VDC, 360 watts for 2 minutes max.
Noise level for either raising or lowering	max. 61 dBA max. (with or without load)
Rating	24 VDC 15 A
Medical equipment	Type BF protection against electrical shock in accordance with IEC60601-1
Battery type	2X 12 V, 5 Ah, sealed rechargeable valve regulated lead acid battery
Battery capacity	Provides up to 120 transfers with a load of 100kg (220 lb), up to 32 transfers with a load of 272 kg (600 lb), up to 70 transfers with a load of 200kg (440 lb)
Battery Autonomy	Provides up to 120 transfers with a load of 100 kg (220 lb), up to 70 transfers with a load of 200 kg (440 lb) , 32 transfers with a load of 272kg (600 lb)
Battery Charger input	100-240 VAC 50-60 Hz
Battery Charger output	28.1 VDC 1 A max
Battery Charger safety protection	Class 2, double insulated 28.1 VDC 1 A max
Low battery indicator	Audible, visual LED and battery status on LCD screen
Charging indicators	Blinking green LED and battery scrolling symbol on screen
Degree of protection	IP24 (lift), IPX7 (Handcontrol)
Lift - protection class	Shock prevention Internally powered equipment
Electronic microprocessor	Soft-start and stop motor control
Maintenance required indicator	Visual LED, symbol and code on LCD screen
Noise level for either raising or lowering, with or without load.	61 dBA max.
ABS fire retardant	V0
SAFETY FEATURES	
Auxiliary up and down emergency buttons	Located on the motor cab
Emergency stopping device (pull cord) accessible from the ground	Stop all electric functions
Manual emergency lowering device	Located on the motor cab
Emergency brake	Triple centrifugal emergency brake system
Return to charge function	Weight sensor cut-out initiated by user (optional)
Compliant with:	ISO10535:2006, IEC60601-1:2005, ISO 10535, UL 60601, IEC 60601, CSA 10535, EN 45501, EUMDR, CE

KEY FEATURES

Charging method

Dedicated charging station (C-Stat)

USB port access

Auxiliary buttons

Lowering and raising auxiliary buttons.

Control panel with LCD screen

Interactive screen displaying information such as total lifts, maintenance and malfunction indicator.

Optional Spreader bars with loop latches

Emergency stop

Spreader bar

IPX7 handset

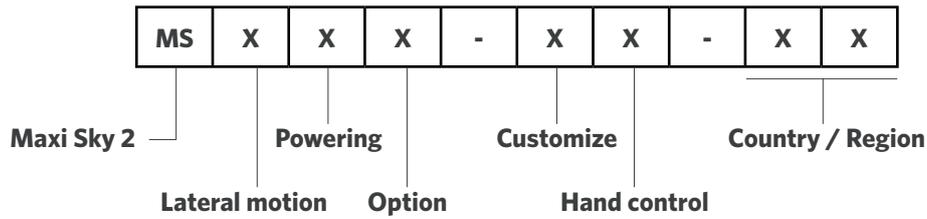

Maxi Sky 2 basic with Maxi Sky transportable C-Stat

PRODUCT INFORMATION

GENERAL	
Weight, complete (Four-function model)	12.3 kg (27 lb)
Weight, complete (Two-function model)	11.6 kg (26 lb)
Operating force of control	< 5 N
Lifting capacity	120 kg (265 lb), 200 kg (440 lb), 272 kg (600 lb)
Strap length	2500 mm (98.4")
Lifting speed	5.1 cm/sec (2.0") without load 4.2 cm/sec (1.7") at 120 kg (265 lb) 3.8 cm/sec (1.5") at 200 kg (440 lb) 3.3 cm/sec (1.3") at 272 kg (600 lb)
Maximum stroke (from ceiling)	2300 mm (90.6")
Adjustable horizontal displacement speeds	10, 15, 20 cm/sec. (4, 6, 8"/sec.). Preset at 20 cm/sec (8"/sec.)
ELECTRICAL	
Duty cycle	Up/Down Motor: Max 10%, 2 minutes continuously Left/Right Motor: Max 20%, 5 minutes continuously Sit/Reclined Motor: Max 10%, 2 minutes continuously
Charging method compatible	Contact station
Horizontal axis motor	24 VDC, 62 watts
Vertical axis motor	24 VDC, 360 watts for 2 minutes max.
Noise level for either raising or lowering	max. 61 dBA max. (with or without load)
Rating	24 VDC 15 A
Medical equipment	Type BF protection against electrical shock in accordance with IEC60601-1
Battery type	2X 12 V, 5 Ah, sealed rechargeable valve regulated lead acid battery
Battery capacity	Provides up to 120 transfers with a load of 100 kg (220 lb), up to 32 transfers with a load of 272 kg (600 lb), up to 70 transfers with a load of 200 kg (440 lb)
Battery Autonomy	Provides up to 120 transfers with a load of 100 kg (220 lb), up to 70 transfers with a load of 200 kg (440 lb), 32 transfers with a load of 272 kg (600 lb)
Battery Charger input	100-240 VAC 50-60 Hz
Battery Charger output	28.1 VDC 1 A max
Battery Charger safety protection	Class 2, double insulated 28.1 VDC 1 A max
Low battery indicator	Audible, visual LED and battery status on LCD screen
Charging indicators	Blinking green LED and battery scrolling symbol on screen
Degree of protection	IP24 (lift), IPX7 (Handcontrol)
Lift - protection class	Shock prevention Internally powered equipment
Electronic microprocessor	Soft-start and stop motor control
Maintenance required indicator	Visual LED, symbol and code on LCD screen
Noise level for either raising or lowering, with or without load.	61 dBA max.
ABS fire retardant	V0
SAFETY FEATURES	
Auxiliary up and down emergency buttons	Located on the motor cab
Emergency stopping device (pull cord) accessible from the ground	Stop all electric functions
Manual emergency lowering device	Located on the motor cab
Emergency brake	Triple centrifugal emergency brake system
Return to charge function	Weight sensor cut-out initiated by user (optional)
Compliant with:	ISO10535:2006, IEC60601-1:2005, ISO 10535, UL 60601, IEC 60601, CSA 10535, EN 45501, EUMDR, CE

PRODUCT INFORMATION

GENERAL	
Weight, complete (incl. trolley and two ceiling lifts)	51.6 kg (113.5 lb)
Weight, spreader bar	6.6 kg (14.5 lb)
Lifting capacity	Dual Mode: 454 kg (1000 lb), Single Mode: 272 kg (600 lb)
Strap length	2500 mm (98.4 in)
Lifting speed (Dual mode)	4.3 cm/s (1.7 in/s) without load 3.5 cm/s (1.3 in/s) at 240 kg (528 lb) 3.0 cm/s (1.2 in/s) at 400 kg (880 lb) 2.8 cm/s (1.1 in/s) at 454 kg (1000 lb)
Maximum stroke (from ceiling)	2300 mm (90.6 in)
Horizontal displacement speeds	N/A, manually operated
Operating force of control	< 5 N
Push and pull forces at 454 kb (1000 lb) Horizontal Movement and Rotation	< 6 N
ELECTRICAL	
Duty cycle	Up/Down Motor: Max 10%, 1 minute continuously Sit/Reclined Motor (single mode): Max. 10%, 2 minutes continuously
Horizontal axis motor	N/A
Vertical axis mode	24 VDC, 62 watts
Rating	24 VDC, 15 A max.
Noise level for either raising or lowering, with or without load	58.2 dBA with no load, 65.3 dBA at 454 kg (1000 lb)
Medical equipment	Type BF protection against electrical shock in accordance with IEC 60601-1
Battery type	12 V, 5 Ah, sealed rechargeable valve regulated lead acid battery
Battery capacity	Provides up to 120 transfers with a load of 200 kg (440 lb), up to 70 transfers with a load of 400 kg (880 lb)
Degree of protection - Hand control	IPX7
Degree of protection - Maxy Sky 2 ceiling lift	IP24
Lift - Protection class - Shock prevention	Internally powered equipment
Battery charger input	100-240 VAC, 50-60 Hz, 57 - 70 VA
Battery charger output	28.1 VDC, 1 A max, 28.1 VA
Battery charger safety protection	Class 2, double insulated
OPERATION, TRANSPORT AND STORAGE CONDITIONS	
Normal Operation	Ambient temperature range: 5°C to 40°C (41°F to 104°F) Relative humidity range: 0% to 93% Atmospheric pressure range: 700 hPa to 1060 hPa
Transport/Storage	Ambient temperature range: -40°C to 70°C (-40°F to 158°F) Relative humidity range: 0% to 100% Atmospheric pressure range: 500 hPa to 1060 hPa

1 700-19485	Scale Unit/ 272 kg (600 lb) Quick Connect

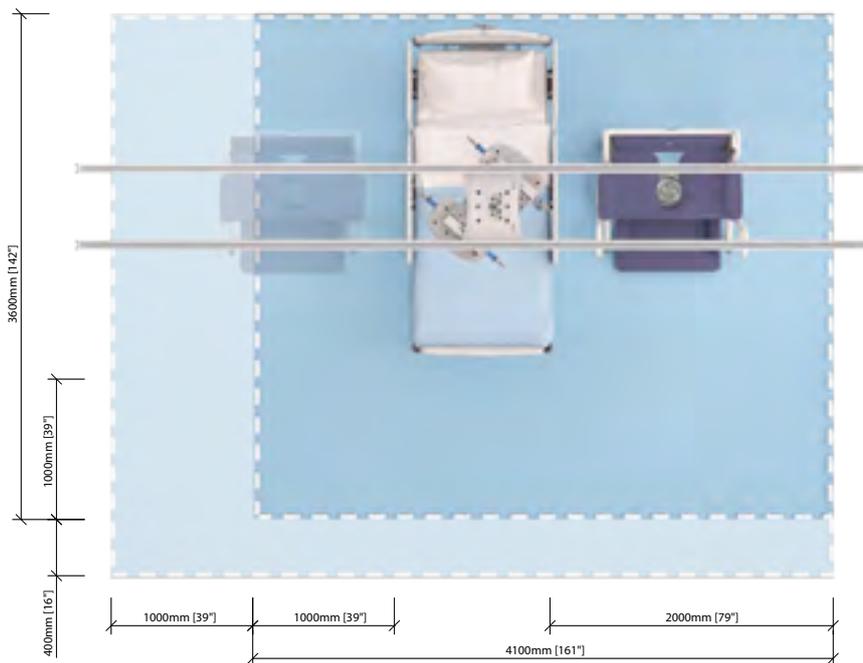

2 700-19490	Scale Unit/ 272 kg (600 lb) Class III ¹ Quick Connect
--------------------	--

¹ Class III scales shall be calibrated by a notified body, prior to put into service.

Note: Weighing a patient with an Maxi Sky 2 Plus in dual mode requires two identical scales. The class III precision is not achievable in this case. In Single mode, the weighing method and precision are the same as for a Maxi Sky 2, and requires only one scale.

SPACE REQUIREMENTS

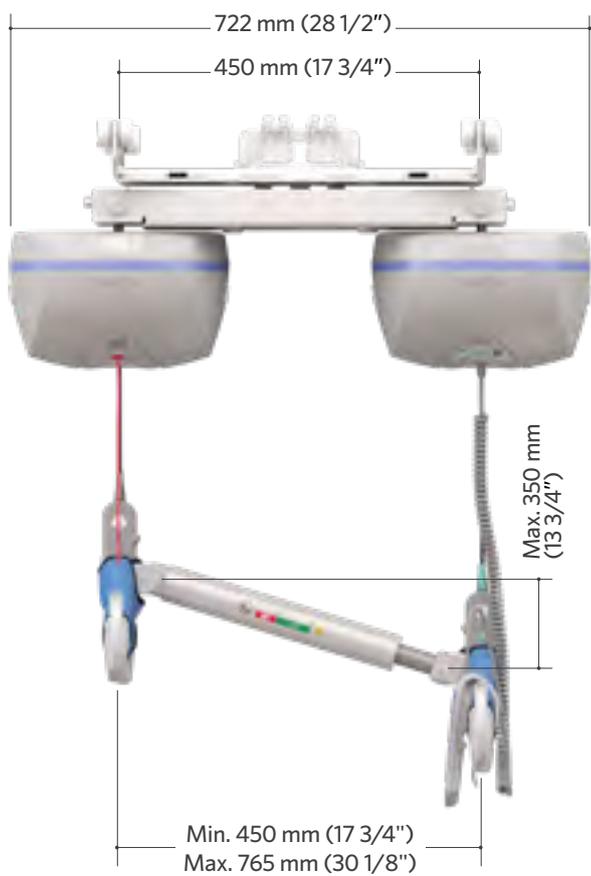

For more information about Space requirement, consult the Arjo Guide for Architects and Planners website.

- Blue area shows the minimum working area required for the staff to be able to use the floor lifter in an ergonomic way from one side.
- Light blue area shows required extension of working area to facilitate activities from either side to provide adequate access for the patient, floor lifter and assisting carer.

PRODUCT INFORMATION

GENERAL	
Lifting capacity	454 kg (1000 lb)
Weight, complete	22 kg (48 lb)
Lifting speed	6.0 cm/s (2.4 in/s) without load 3.5 cm/s (1.4 in/s) at 230 kg (500 lb) 2.7 cm/s (1.2 in/s) at 454 kg (1000 lb)
Adjustable horizontal displacement speeds	10, 13, 15 and 20 cm/s. Speed is 15 cm/s (6 in/s) by default
Electronic microprocessor	Soft-start and stop motor control
Maintenance required indicator	Visual LED
Lift - protection class - shock prevention	Internally powered equipment
Strap length	2300 mm (90.6 in)
Noise level for either raising or lowering, with or without load.	61 dBA max.
BATTERIES	
Battery	(2X) 12 V, 7 Ah
Battery capacity	Provides up to 80 transfers with a load of 230 kg (500 lb), up to 25 transfers with a load of 454 kg (1000 lb).
Low battery indicator	The yellow light "charger" flashes while charging and illuminates when charge is finished.
Charging indicators	The green light "on" illuminates once the lift is on and ready for use; the green light flashes when the batteries are low.
HAND CONTROL	
Low force activation buttons, polyester membrane	IPX7
ABS fire retardant	V0
CHARGER UNIT	
Power indicator on charging module	
100-240 Vac/50-60 Hz/24 VA	
Battery Charger safety protection	Class 2, insulated
Clip on charger anywhere on the track	
SAFETY FEATURES	
Electrical up and down emergency buttons	Located on the motor cab
Emergency stopping device (pull cord) accessible from the ground	Stop all electric functions
Manual emergency lowering device	Accessible from the motor cab
Lights	The red light illuminates to confirm that the lift is in the programming service mode. The red light illuminates in the normal mode when the lift is under overheat protection caused by an overuse. The red light flashes when servicing is required (contact customer service).
Emergency brake	Triple centrifugal emergency brake system
Return to charge function	Weight sensor cut-out initiated by user (optional)
Compliant with	ISO10535:2006, IEC60601-1:2005

PRODUCT INFORMATION

GENERAL	
Lifting capacity	200kg (440 lb)
Unit weight (batteries included)	6.35kg (14 lb)
Lifting speed	4.3 cm/s (1.7 in/s)
Folding sling hooks	Reduced space for storage/transport
Electronic microprocessor	Soft-start and stop motor control
Maintenance required indicator	Visual LED
Lift - protection class - shock prevention	Internally powered equipment
Strap length	2200 mm (88 in)
Noise level for either raising or lowering, with or without load.	54 dBAmx.
BATTERIES	
Battery	2x2.3 Ah will average 2 to 4 hours to a complete charge
Battery capacity	Provides up to 30 transfers with a load of 80kg (176 lb)
Low battery indicator	Audible
Charging indicators	"Blinking yellow - charging/ full yellow - charging completed"
HAND CONTROL	
Low force activation buttons, polyester membrane.	IPX7
ABS fire retardant	VO
CHARGER UNIT	
Power indicator on charging module	
100-240 Vac/50-60 Hz/24 VA	
Battery Charger safety protection	Class 2, double insulated
SAFETY FEATURES

¹ All elements related to Maxi Sky 2 Plus may need specific accessories and configurations.

Fixed tracking solutions

Anatomy of a tracking layout

- 1 Structural attachment point**
The attachment point where the ceiling track is installed to the building ceiling structure
- 2 Threaded rod**
This acts as the attachment point between the ceiling track bracket and the upper structure, when the ceiling is suspended
- 3 Ceiling track**
The ceiling track serves to carry the ceiling lift and/or track accessories
- 4 X-Y system mobile track**
The mobile track moves along the fixed rails to allow for use of the lift in all areas that the track encompasses

- 5 Charging station**
Can be located at any point along the rail
- 6 X-Y trolley**
The wheels ride inside the fixed rails and are attached to the mobile track
- 7 Ceiling lift**
A variety of lifts are available in different weight capacities with different features
- 8 Gate assembly**
Allows the transfer from a X-Y system mobile track to a linear track
- 9 Linear track**
A section of track that can access various points in the room. Available in various lengths and curved designs

- 10 Modified door header**
Opening above doorway to allow the track to pass through into another door. Different options are possible
- 11 Bridging**
To avoid ceiling obstacles, such as ducts or vents.

Kwiktrak rail with ECS

Embedded Kwiktrak rail with ECS and an open access door

X-Y system Kwiktrak rails powered by ECS

Maxi Sky 2 on a linear track, going to a bathroom, through a door header. The rail is lowered to be aligned with the bedroom X-Y system the motor is coming from

Maxi Sky 2 on a X-Y system

Maxi Sky 2 passing through a gate

Closed door with a Kwiktrak rail passing through.

Typical installation layouts

The below top view images of different examples of tracking layout for overhead patient lifts will provide slightly different clinical outcomes.

LINEAR TRACKING SOLUTIONS

Linear tracks intended for direct transfers between bed and wheelchair, day chair, etc. With the track at a slight angle to the bed, it is easier to find the optimum point for lifting the resident/patient.

Ceiling mounted. Two separate tracks installed over bed and toilet, (high traffic area for patient handling tasks), possibly a portable lift is best.

Ceiling mounted. Straight track with curve, providing an out of the way charging area for fixed ceiling lifts.

Cost effective. This is a linear layout with multiple curves, crossing the bed, connecting the toilet area. Return to charge (RTC) can be used. When ceiling heights if of concern, a linear tracking layout would maximise stroke (vs X-Y installation). ADL activity could be performed with the walking harness including in bed activities or walking to the bathroom. All typical daily tasks such as bed to wheelchair transfer, transfer to the washroom area can be efficiently performed.

Wall mounted linear track, using wall brackets.

Wall mounted. Linear track with wall posts, for fixed or portable ceiling lifts.

Wall mounted. Linear track, combining wall bracket, side wall posts and T-junction, for fixed or portable ceiling lifts.

X-Y TRACKING SOLUTIONS

X-Y tracking solutions are intended to provide full room coverage, over an entire area...enabling the care providers to pick up a patient anywhere below the tracking solution...and providing additional area coverage possibly for different types of patient handling tasks, like bringing rehab into the patient room.

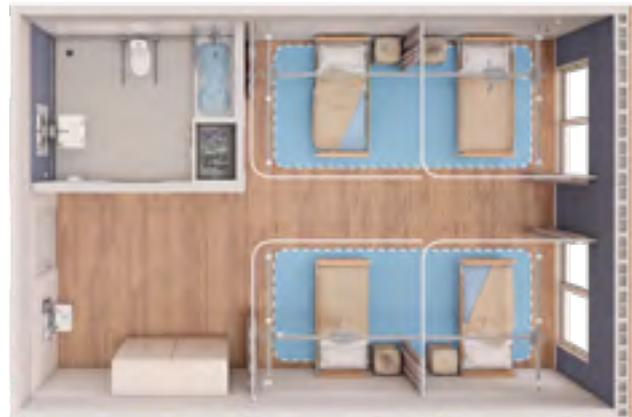

Ceiling mounted. X-Y tracking solution, for fixed or portable ceiling lifts.

Wall mounted. X-Y tracking solution, for fixed or portable ceiling lifts.

Wall mounted. X-Y tracking solution covering the entire living area, lowered bathroom walls permitting the traverse track of the X-Y system to travel above the walls.

Ceiling mounted. Two separate X-Y tracking solutions, covering each side of the room. For fixed or portable ceiling lifts.

Ceiling mounted. X-Y tracking solution, covering two beds for fixed or portable ceiling lifts.

TRACKING WITH ACCESSORIES SOLUTIONS

Here are some examples of connected track layouts that could possibly be used. ADL activity could be performed allowing access to the bathroom, with the walking harness.

Here is an example of when a Linear Turntable track layout that could possibly be used....a linear layout crossing the bed, out of the way to permit charging out of the way in the corner, to maximize stroke, if ceiling heights is of concern, (RTC) return to charge, can be used when we use the 4function MS2, ADL activity could be performed allowing in the bathroom, with the Walking harness...

Here is an example of an 'X-Y Gate' tracking system.

Full room coverage in Patient Room, and Linear coverage in bathroom, above toilet.
One X-Y room covering system covering patient room, joined by a linear track and connecting to the bathroom. Charging solution can be in either patient room or bathroom, or both rooms if desired.

Here is an example of a 'Double Gate' tracking system.

Full room coverage in Patient Room, and Full Room coverage in bathroom. One X-Y room covering system covering patient room, joined by a linear track and connecting to another X-Y room covering system in bathroom. Charging solution can be in either patient room or bathroom, or both rooms if desired.

Here is an example of when a X-Y tracking layout combined with a Turntable providing access to the bathroom, or exiting the room leading into the corridor, that could possibly be used...with this track layout, the linear tracking portion of the tracking network, will therefore be descended down, (below the ceiling) using an aesthetic rod covering matching the same height as the Traverse track on the X-Y layout...

Here is an example of when an Exchanger could possibly be used....

Ideally an exchanger is incorporated into the track layout, when we have one track path that is Frequent, and not so frequent...in this example we have a need to enter from the bedroom into the connected bathroom...but from time to time the care provider needs to bring the patient into the corridor, possibly to bring into the Central bathing room, or simply into the corridor for some ambulatory training...Only swap the path when planning to leave the room with a patient in the ceiling lift

Anatomy of a track

KWIKtrak™ includes track, curves, X-Y traverse systems, gates, turntables, exchangers, and many modular components that can be combined to create the ideal 'Fixed tracking' layout for your specific requirements. The modular component concept of KWIKtrak™, especially the patented track bracket, means the system's installation procedure is fast and with minimal disruption to your environment, making sure your Maxi Sky® series of ceiling lifts is up and running promptly.

1 EMBEDDED PROFILE

Mounted into the ceiling, this profile equipped with a lip, facilitates seamless integration with your ceiling, which enables a more discrete look as well as increasing lifting stroke.

2 TRACK JUNCTIONS

Smooth seamless joints use a unique pin locking system that improves lateral movement and a finished appearance.

3 PROFILE DESIGN

Slim symmetrical design rail is aesthetically pleasing and permits a tight turning radius on curves.

4 THE TRACK BRACKET

This patented track bracket design ensures a fast installation and facilitates leveling with minimal disruption to your environment. Its built-in locking indicator provides a visual evidence to the inspector confirming the bracket is properly secured.

5 STANDARD PROFILE

Typically used and installed below ceilings. The white color with gloss smooth finish blends in nicely into any room decor.

6 CLEANING & DISINFECTION

Effective disinfection methods that comply with local or national guidelines.

X-Y System

Room covering system

LAYOUT EXAMPLE

The X-Y rail system allows the lift to be moved in any direction over a predetermined area, enabling Maxi Sky to cover the entire surface. Moving the ceiling lift in Y axis direction requires moving the lift and the traverse track simultaneously.

USAGE EXAMPLE

Two bed patient room

X-Y system covering two beds with extended fixed tracks providing coverage between foot of bed and wall for rehab purposes. Gaps in fixed tracks, maintain patient privacy, permitting the curtains to pass through.

Bathing room

X-Y system providing full coverage, enabling transfers in shower area and bathing area.

Single bed bariatric patient room single traverse

A single traverse track bariatric X-Y system covering bed with extended fixed tracks providing coverage between foot of the bed and wall for rehab purposes...

Single bed bariatric patient room dual traverse

...this solution is also available for Maxi Sky 2 Plus with its dual traverse track system

Morgue

A single traverse track system can increase work space and efficiency in this type of environment.

Therapy pool area

At pool side or when patient is in pool, to support rehabilitation exercises during aquatic therapy.

Page intentionally left blank

Gate

Locks tracks together when linking two rail systems

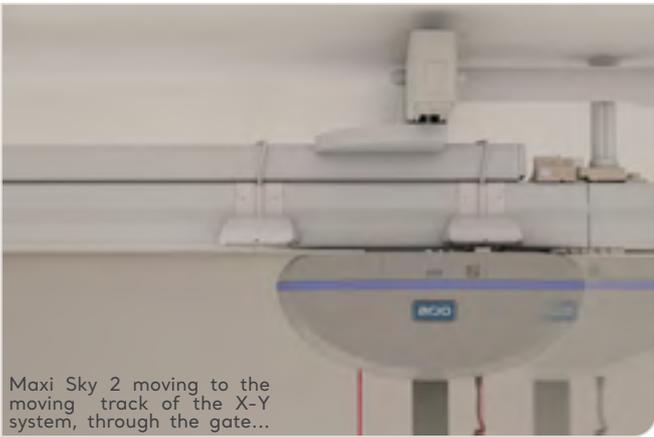

Anatomy of the gate system

The KWIKtrak Gate system is a track accessory to be used with the KWIKtrak tracking system, and a fixed ceiling lift like Maxi Sky 2. The Gate system allows the ceiling lift to travel from a mobile 'traverse' track section to a Linear track section and/or vice versa.

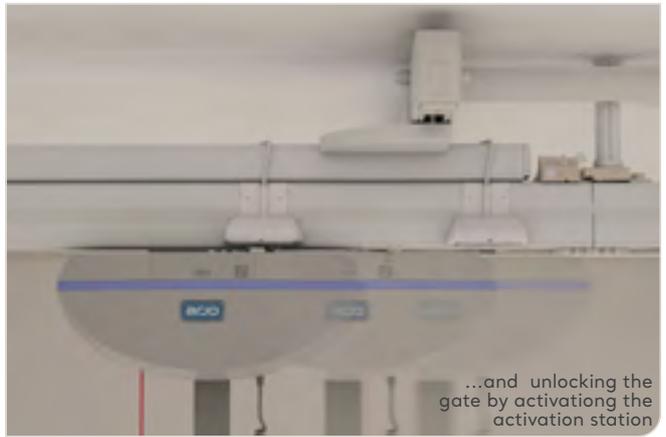

KEY FEATURES

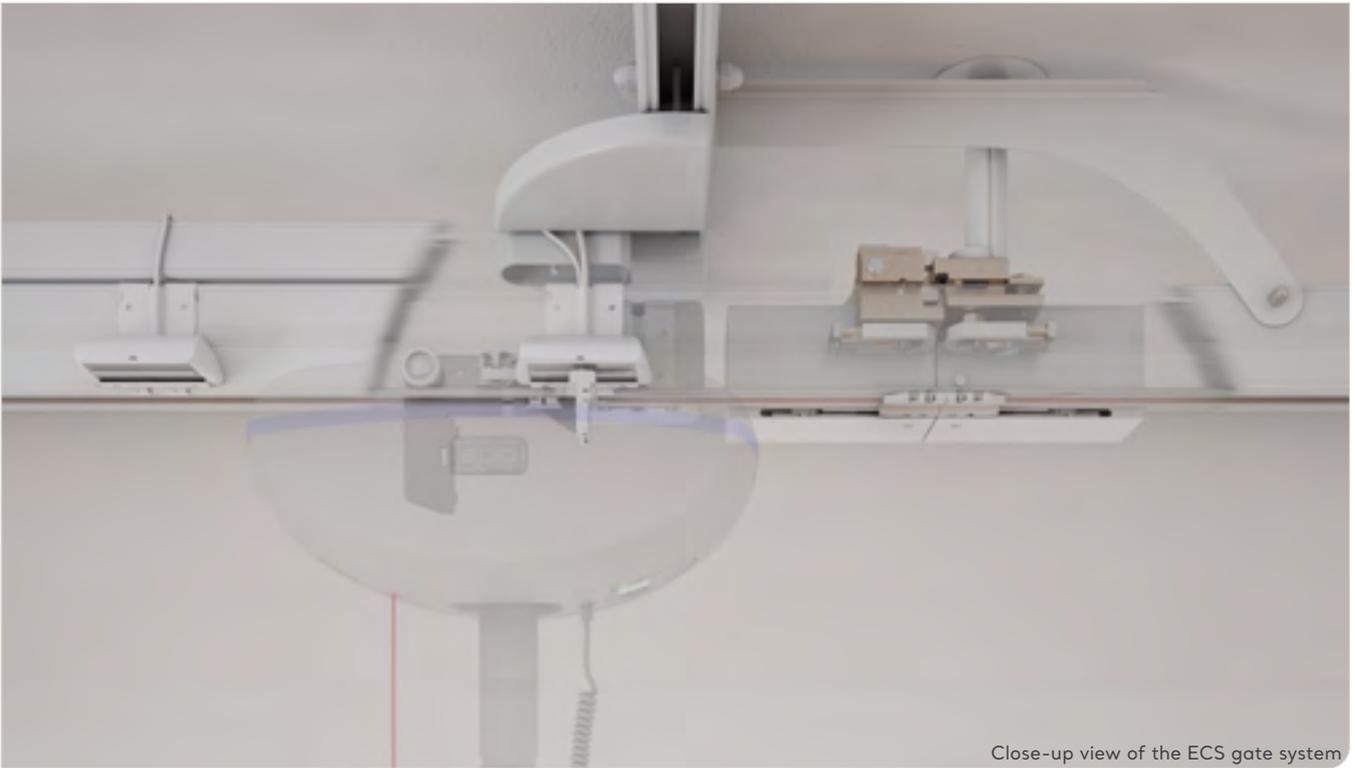

- 1 Gate boxes
- 2 X-Y Trolley
- 3 Mobile track (traverse)
- 4 Activation station
- 5 Deactivation station
- 6 Support arm
- 7 Energy reserve box
- 8 ECS ramps kit (optional)
- 9 Fixed tracks
- 10 Continuing linear tracks

Maxi Sky 2 moving to the moving track of the X-Y system, through the gate...

...and unlocking the gate by activating the activation station

GATE FOR MAXI SKY 2 USAGE EXAMPLES

Standard X-Y Solution with Single Gate

An X-Y traverse system combined with a gate and single track. Creates a convenient and comfortable solution for bedroom coverage and toilet access.

Parts required for this gate system ¹:

ARTICLE #	DESCRIPTION
700-11502	KWIKtrak Single Gate System 272 kg (600 lb)

Single X-Y Solution with Double Gate

An X-Y traverse system combined with a double gate and two single tracks. Creates a convenient and comfortable solution for small bedroom coverage and toilet access with a charging zone out of the main area.

Parts required for this gate system ¹:

ARTICLE #	DESCRIPTION
700-11508	KWIKtrak Double Gate System 272 kg (600 lb)

Two X-Y Solutions with Double Gate

Two times X-Y traverse system linked together via a single track. Creates a convenient and comfortable solution for bedroom coverage access.

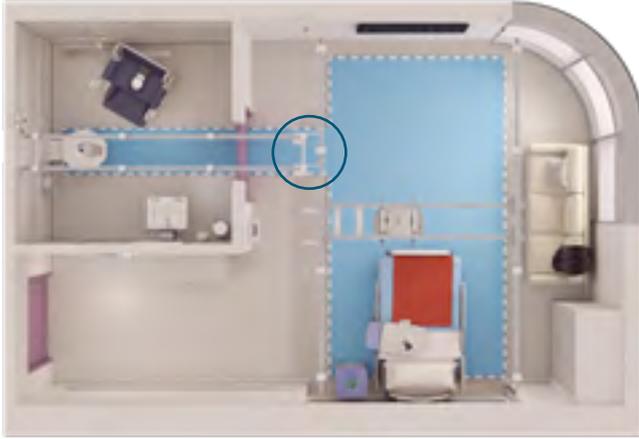

Part numbers required for this layout ¹:

ARTICLE #	DESCRIPTION
700-11508	KWIKtrak Double Gate System 272 kg (600 lb)

¹ This parts list contains only the components required for the regular gate assembly. Tracking, motors, powering, ECS compatibility and others accessories are not included.

GATE FOR MAXI SKY 2 PLUS USAGE EXAMPLES

X-Y (single gate tracking solution)

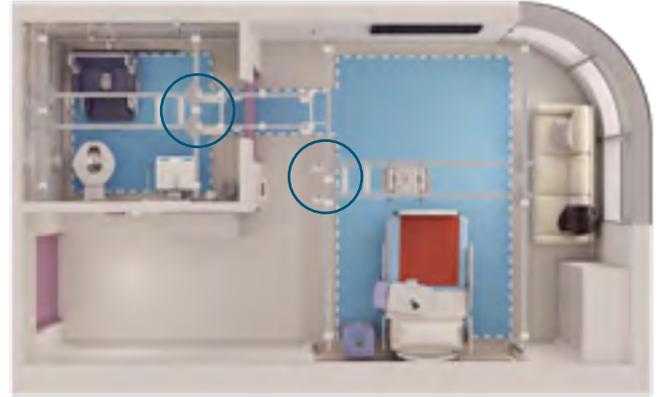

An X-Y tracking solution providing full room coverage within the patient's room combined with a single Gate System and tracking leading into the en-suite bathroom.

Parts required for this gate system¹:

ARTICLE #	DESCRIPTION
700-31297	KWIKtrak MS2Plus Single Gate System 454 kg (1000 lb)

Two X-Y (Double Gate) solution

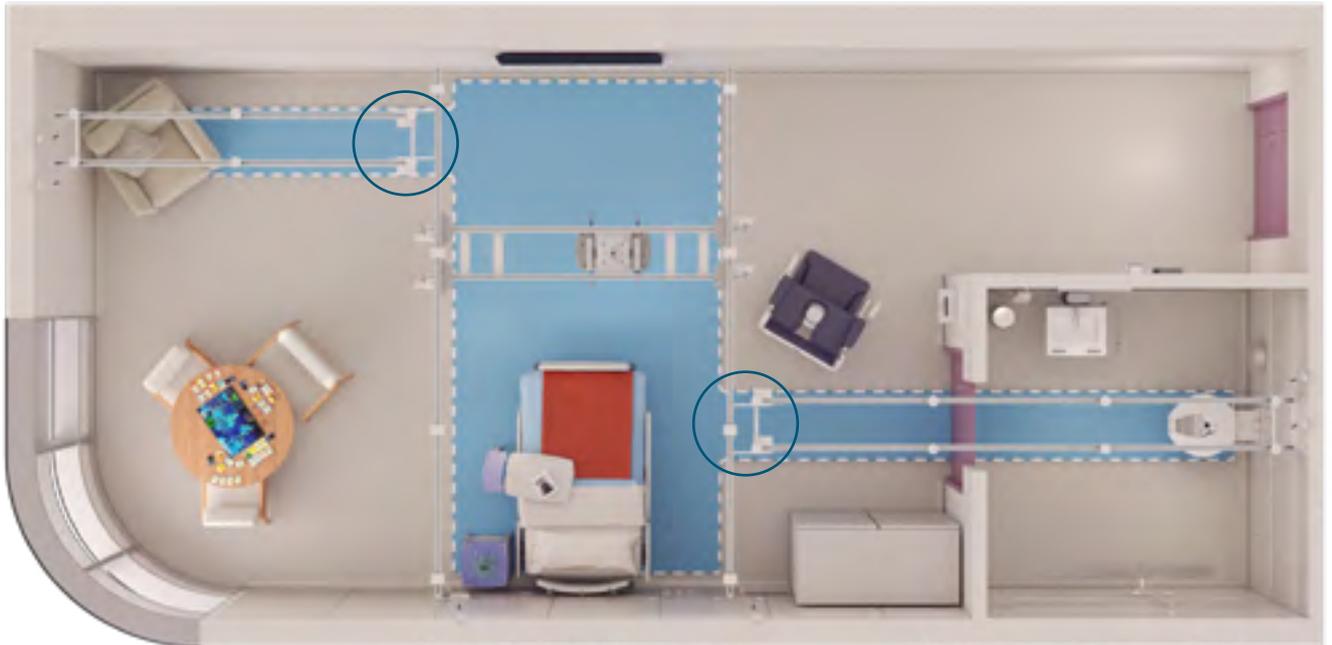

Full-room coverage in both the patient's room and the en-suite, linked together with a straight track configuration using a Double Gate system.

Parts required for this gate system¹:

ARTICLE #	DESCRIPTION
700-31254	KWIKtrak MS2Plus Double Gate System 454 kg (1000 lb)

Single X-Y (Double Gate) solution

Full-room coverage in the patient's room and single tracks branching off on either side of the single X-Y, using the Double Gate system.

Parts required for this gate system¹:

ARTICLE #	DESCRIPTION
700-31254	KWIKtrak MS2Plus Double Gate System 454 kg (1000 lb)

¹ This parts list contains only the components required for the regular gate assembly. Tracking, motors, powering, ECS compatibility and others accessories are not included.

Turntable

Run tracks in multiple directions

Enhanced Charging System (ECS)

Charge anywhere along the track layout

Anatomy of the ECS

The Enhanced Charging System (ECS) rail system allows the ceiling lift to charge anywhere it is left on the tracking layout. It eliminates the user to return the ceiling lift to the charger following the patient transfer. Within 15 seconds of releasing a button on the handset, the ceiling lift will commence topping up it's battery energy.

KEY FEATURES

1 Power supply

2 End of track wire kit

Competitor and legacy tracks compatibility

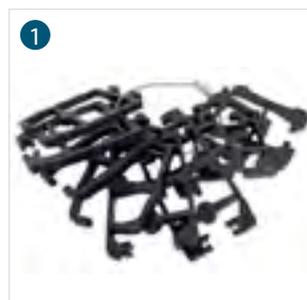

Use your Maxi Sky 2 on other tracking systems

Over the years, Arjo developed various solutions that allow some of our ceiling lifts to be installed on competitor or legacy tracks.

The replacement of our legacy products or products from the competition represents an important opportunity for the group, but it also brings different challenges that require a specific process to ensure we provide the right advices and solutions to our customers.

Semi-permanent rack (2-Posts)

Portable non-permanent track system

USAGE EXAMPLE

Suitable for use with fixed ceiling lifts, our Semi-permanent rack is the ideal solution for temporary yet portable heavy duty lifting.

The Semi-permanent rack in this configuration allows for lifting all along the track and can offer a lifting capacity up to 454kg (1000 lb).

PRODUCT INFORMATION

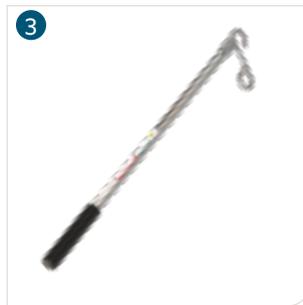

GENERAL	
Weight capacity	Up to 454 kg (1000 lb), depending on the span
Weight	Posts: 16.5 kg (36.5 lb) Base: 10 kg (22 lb) each Total: 53 kg (117 lb) each
Material	Tracks: Aluminium Hardware: Steel, plastic

MAXIMUM KWIKTRAK VS. CAPACITY AND TRACK SIZE

Easytrack FS

Portable free standing track system, for portable ceiling lifts

USAGE EXAMPLE

The revolutionary track lift system Easytrack® FS brings the safety and convenience of a track lift transfer into almost any room. It is easy to use, easy to transport and easy to set up.

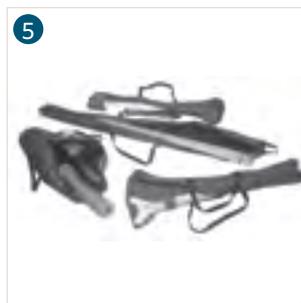

PRODUCT INFORMATION

GENERAL	
Weight capacity	200 kg (440 lb)
Total weight	45 kg (98 lb)

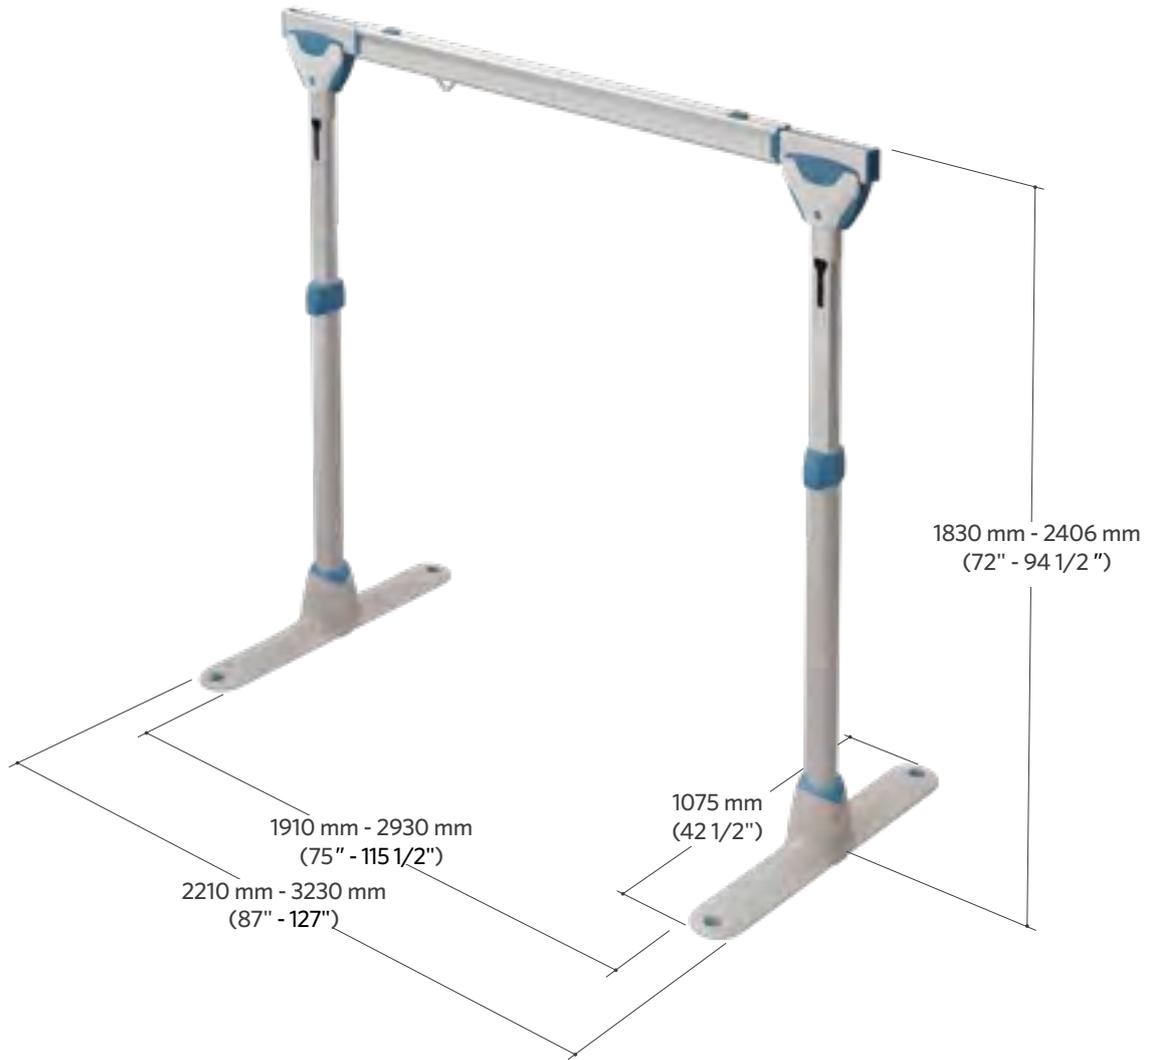

COMMON PARTS

ARTICLE #	DESCRIPTION
1 9720010	Easytrack FS - for portable ceiling lifts (Ceiling lift sold separately)
2 9720090	Easytrack FS - for reps (Ceiling lift sold separately) (Fixed cassette)
3 700.17100	Easytrack FS Base - 2 bases
4 700.17000	Easytrack FS Base - 2 posts
5 002.17010	Protective kit
6 700.17250	Extendable track with trolley 3000 mm (118")
7 700.17500	MaxiKart (Ceiling lifts & EasyTrack FS sold separately)

For an exhaustive list, refer to document:
Easytrack FS and Easytrack FS Rep #001.17350

PRODUCT DIMENSION

Easytrack 2 posts

Pressure fit system, for portable ceiling lifts

USAGE EXAMPLE

The Easytrack® is a pressure fit system requiring no permanent installation. This system allows for vertical transfers. It can be installed above a bed because of the track wide range.

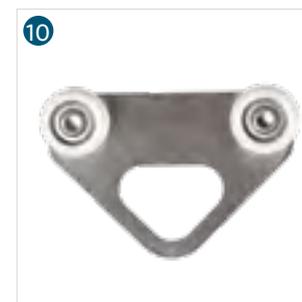

PRODUCT INFORMATION

GENERAL

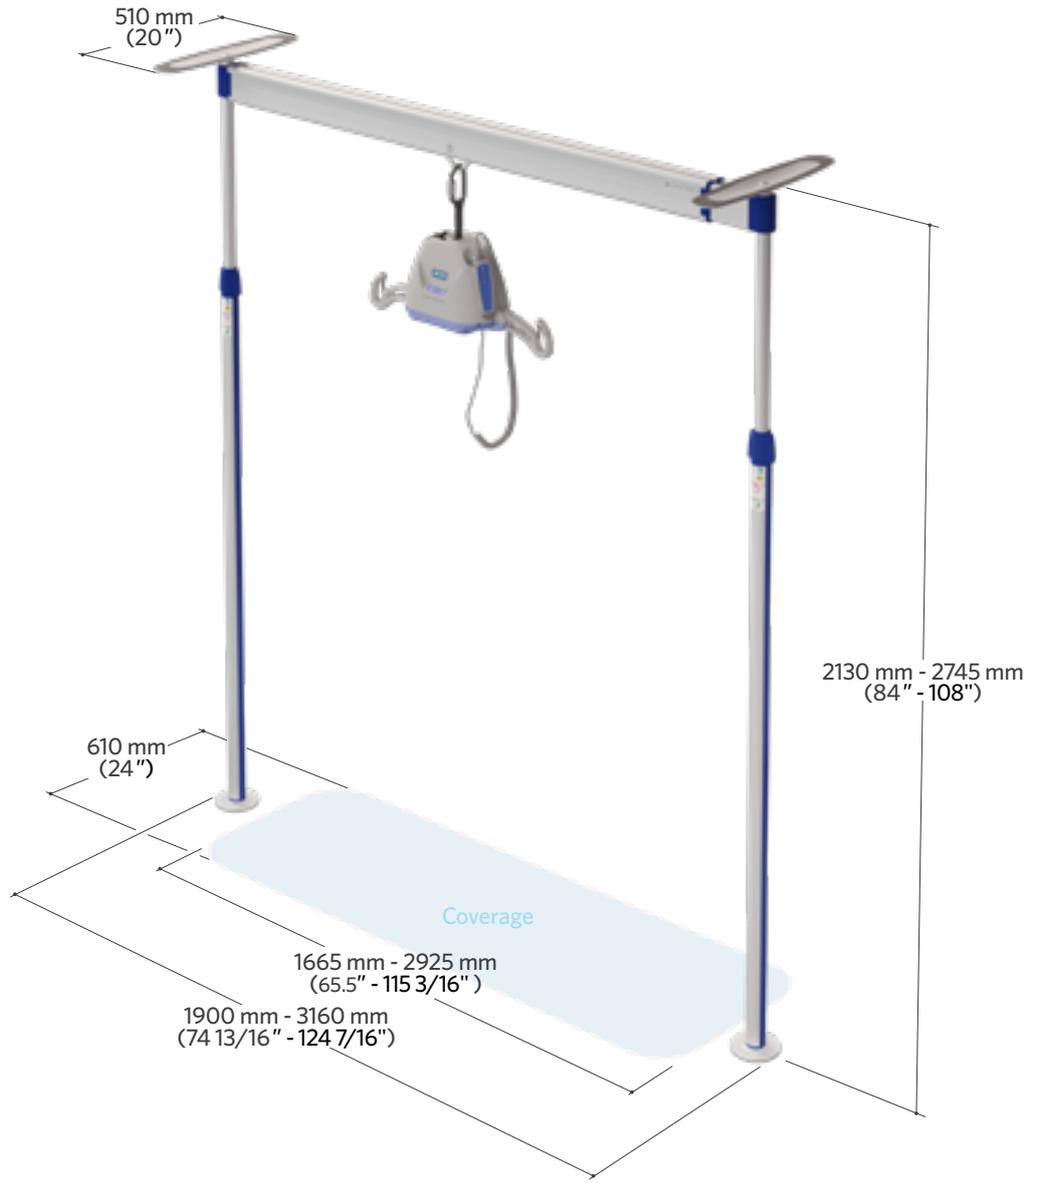

Lifting capacity	200 kg (440 lb)
Weight	20 kg (44 lb)
Material	Aluminium
Ceiling plate	510 mm (20")
Floor plate	120 mm (4.8")
Compliant with:	ISO 10535:2006

COMMON PARTS

ARTICLE #	DESCRIPTION
1 9220010	Easytrack - 2 Post (Ceiling lift sold separately)
2 700.10720	Extendable track & standard trolley 1300-1900 mm (52-75")
2 700.10750	Extendable track & standard trolley 3000 mm (118")
3 700.10500	Standard post
4 700.10230	Post strip (2 pieces)
5 700.10350	Round foot plate for post
6 700.10600	Clip-on level
7 700.10400	Top plate
8 200.10720	Easytrack end cap
9 000.03280	Allen key 6mm
10 700.10650	Track trolley
11 002.10450	Easytrack transport bag

PRODUCT DIMENSION

Easytrack 3 posts

Pressure fit system with pivoting track, for portable ceiling lifts

USAGE EXAMPLE

The Easytrack is a pressure fit system requiring no permanent installation.

When using the 3 posts configuration with a pivoting track, the variation of the Easytrack system enables for straight line lifting within the transfer area generated by the pivoting track.

PRODUCT INFORMATION

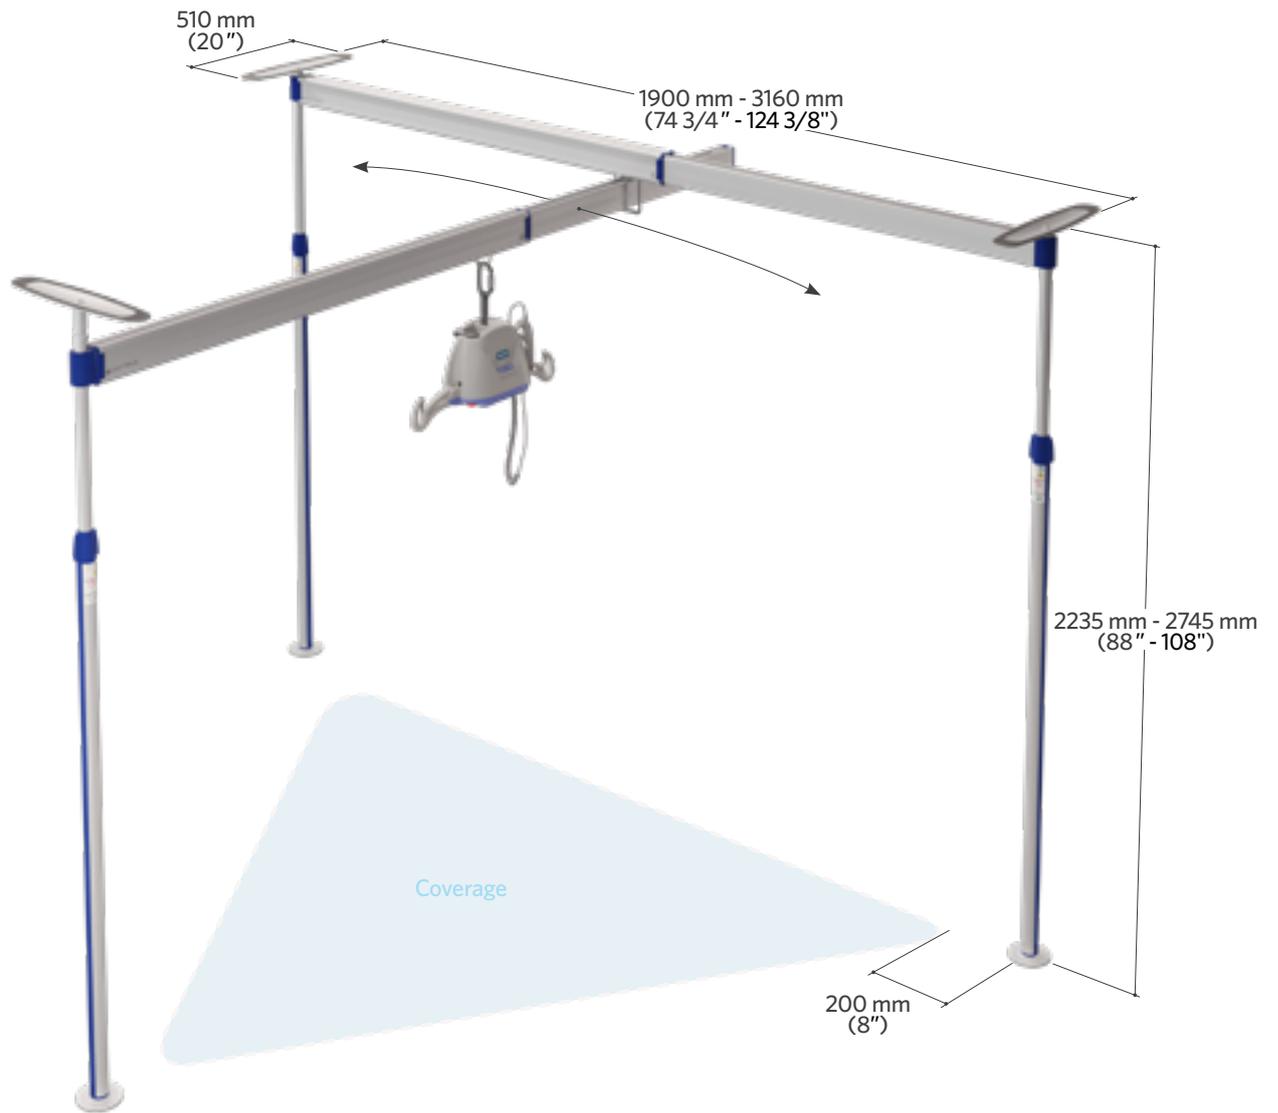

GENERAL	
Lifting capacity	200 kg (440 lb)
Weight	42.5 kg (93.5 lb)
Material	Aluminium
Ceiling plate	510 mm (20")
Floor plate	120 mm (4.8")
Compliant with:	ISO 10535:2006

COMMON PARTS

17 700-08320	Reacher - 910 mm (36")

PRODUCT DIMENSION

Easytrack 4 posts X-Y Gantry

Pressure fit system, for portable ceiling lifts

USAGE EXAMPLE

The Easytrack is a pressure fit system requiring no permanent installation.

The 4 posts configuration with moving 3rd track of the Easytrack system works on two X-Y axes while optimizing lifting options anywhere within the transfer area.

PRODUCT INFORMATION

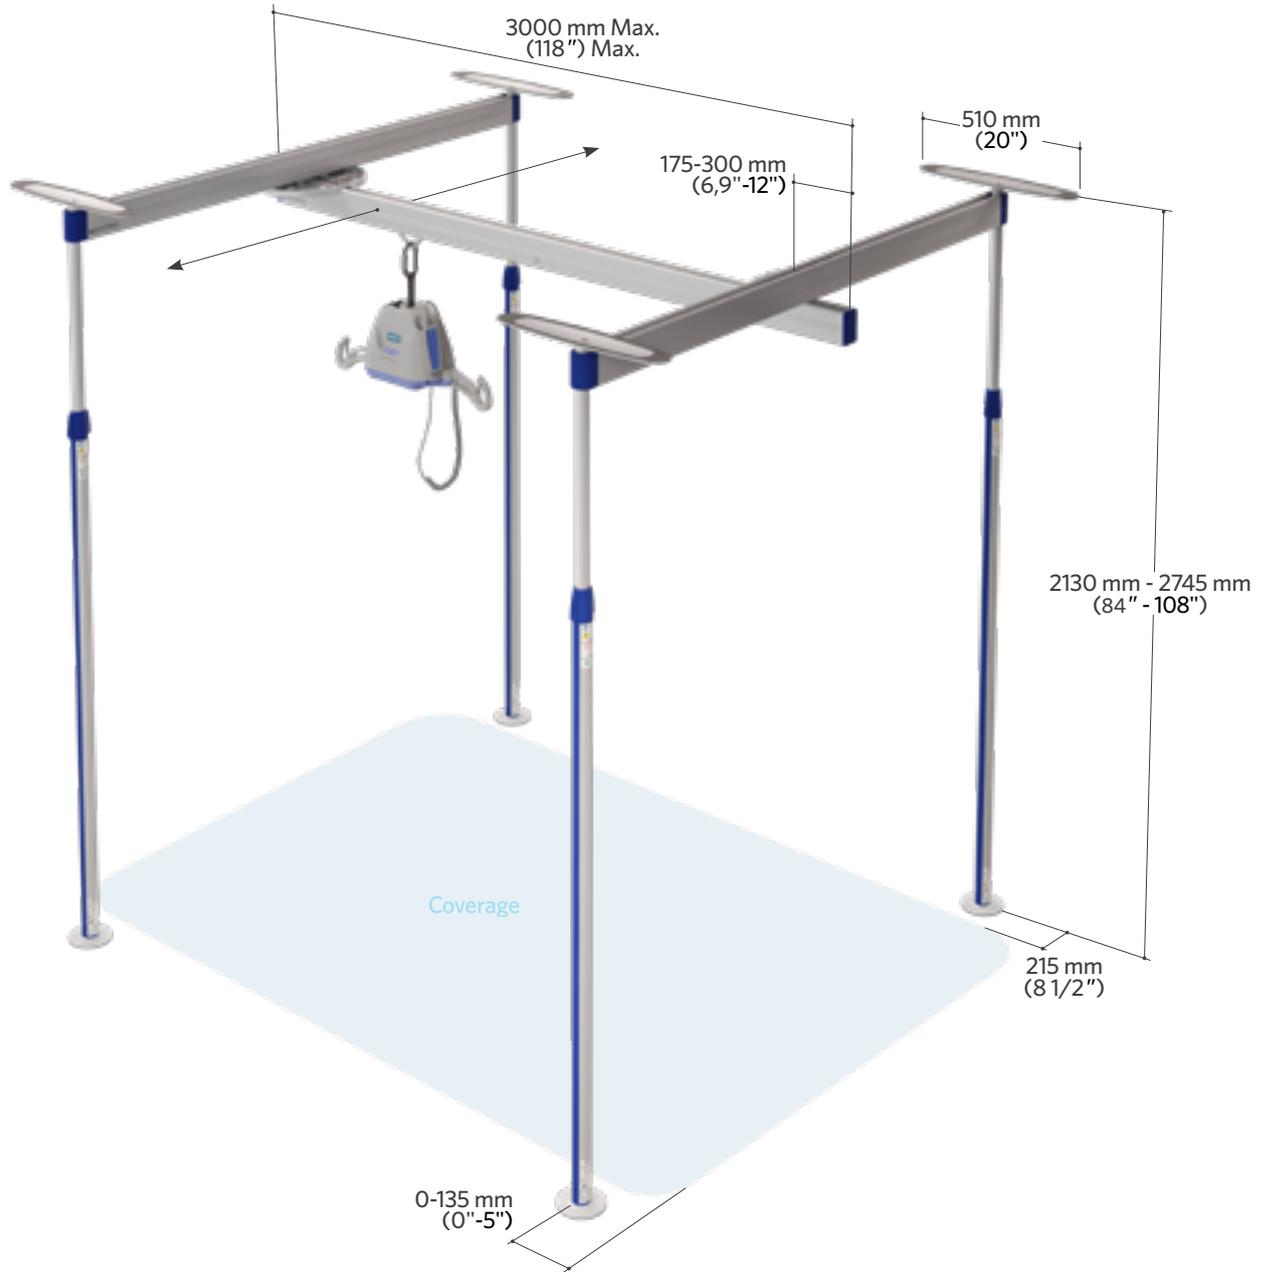

GENERAL	
Lifting capacity	200 kg (440 lb)
Weight	57 kg (125 lb)
Material	Aluminium
Ceiling plate	510 mm (20")
Floor plate	120 mm (4.8")
Compliant with:	ISO 10535:2006

COMMON PARTS

ARTICLE #	DESCRIPTION
1 9440030	Easytrack - 4 Post (Ceiling lift sold separately)
2 700.10250	X-Y Tracks 3000 mm (118")

PRODUCT DIMENSION

Easytrack 2 posts system with a bath adaptor

Pressure fit system, for portable ceiling lifts

USAGE EXAMPLE

The Easytrack is a pressure fit system requiring no permanent installation.

By using the 2 posts configuration with a bath adaptor, it is possible to perform lifting from a wheelchair to the bath. This variation of the Easytrack system allows for straight line transfers directly underneath the track. Other versatile options are available such as 2 posts, 3 posts, 4 posts and wall bracket configurations.

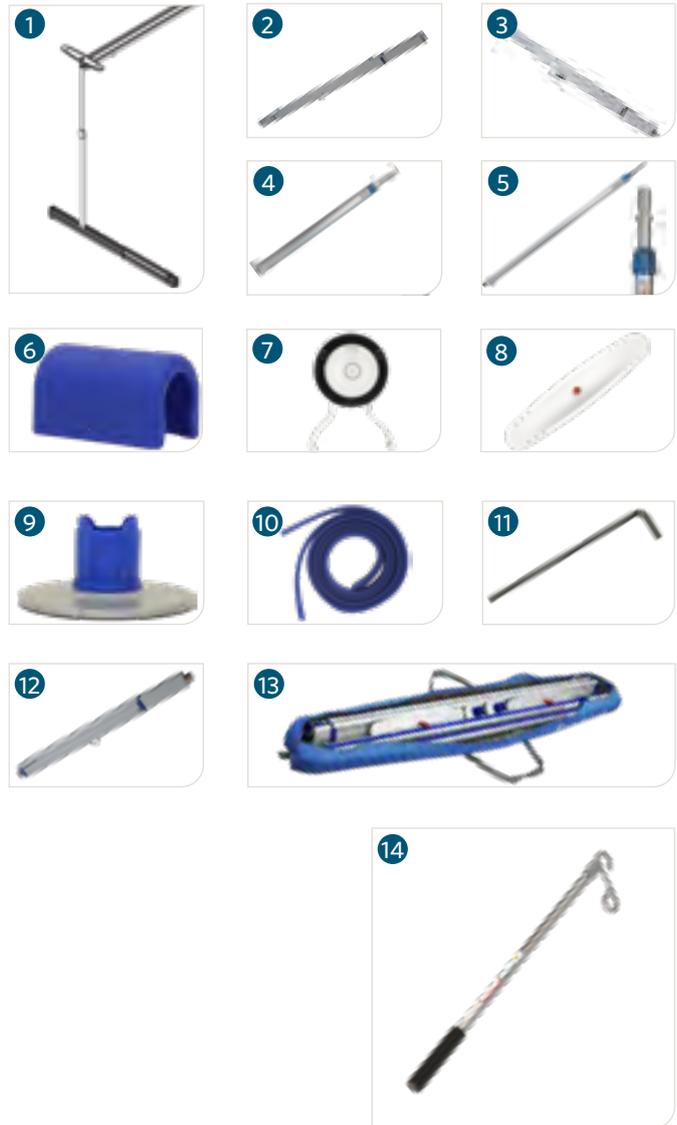

PRODUCT INFORMATION

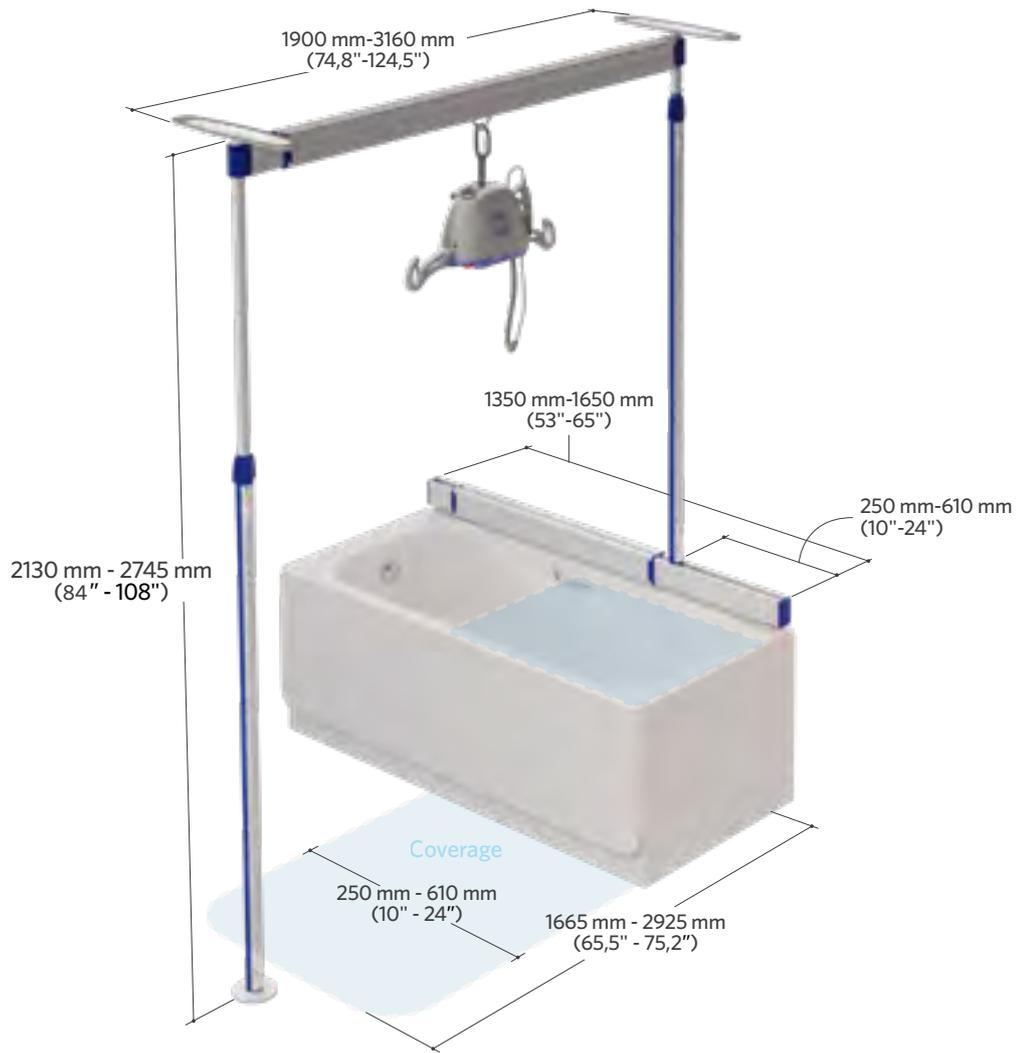

GENERAL	
Lifting capacity	200 kg (440 lb)
Weight	42.5 kg (93.5 lb)

PRODUCT DIMENSION

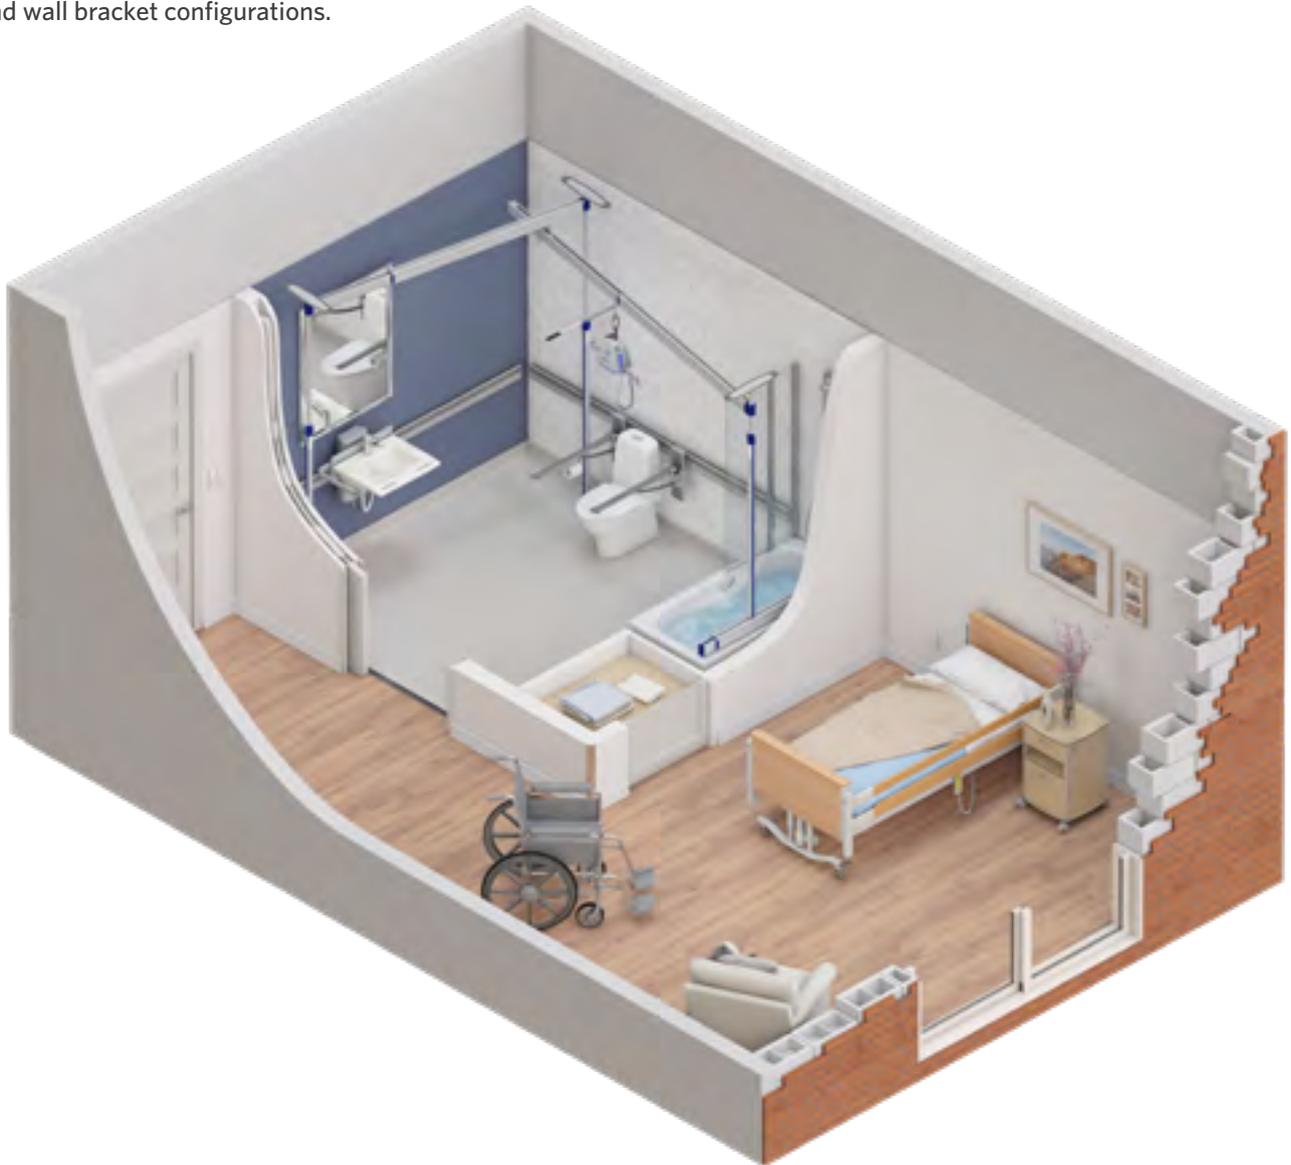

Easytrack 3 post system with bath adaptor

Pressure fit system with pivoting track, for portable ceiling lifts

USAGE EXAMPLE

The Easytrack is a pressure fit system requiring no permanent installation.

By using the 3 posts configuration with a pivoting 3rd track and a bath adaptor, it is possible to perform lifting from a wheelchair to a bath and to the toilet. This variation of the Easytrack system allows for straight line transfers within the transfer area generated by the pivoting 3rd track. Other versatile options are available such as 2 posts, 3 posts, 4 posts and wall bracket configurations.

ARTICLE #	DESCRIPTION
1 9330110	Easytrack - 3 posts & bath adaptor
2 700.10880	Bath adaptor
3 700.10750	Extendable track 3000 mm (118") & trolley
4 700.10250	X-Y Tracks 3000 mm (118")
5 700.10500	Standard post
6 700.10455	Pivoting post assembly
7 200.10720	Round end cap
8 000.03280	Allen key 6mm
9 700.10600	Clip-on level
10 700.10400	Top plate for post
11 700.10350	Round foot plate for post
12 700.10230	Post strip (2 pieces)
13 700.11005	KWIKtrak autolock track stopper
14 700.10720	Extendable track 1300-1900 mm (52-75") & trolley
15 002.10450	Easytrack transport bag
16 700-08310	Reacher - 610 mm (24")
16 700-08320	Reacher - 910 mm (36")

PRODUCT DIMENSION

Easytrack 2 wall brackets

Wall mounting system with wall bracket combination, for portable ceiling lifts

USAGE EXAMPLE

In this option, there are two wall brackets which support a track thus permitting lifting all along this track. Easytrack can also be fastened to the wall in various configurations.

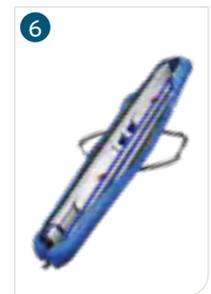

PRODUCT INFORMATION

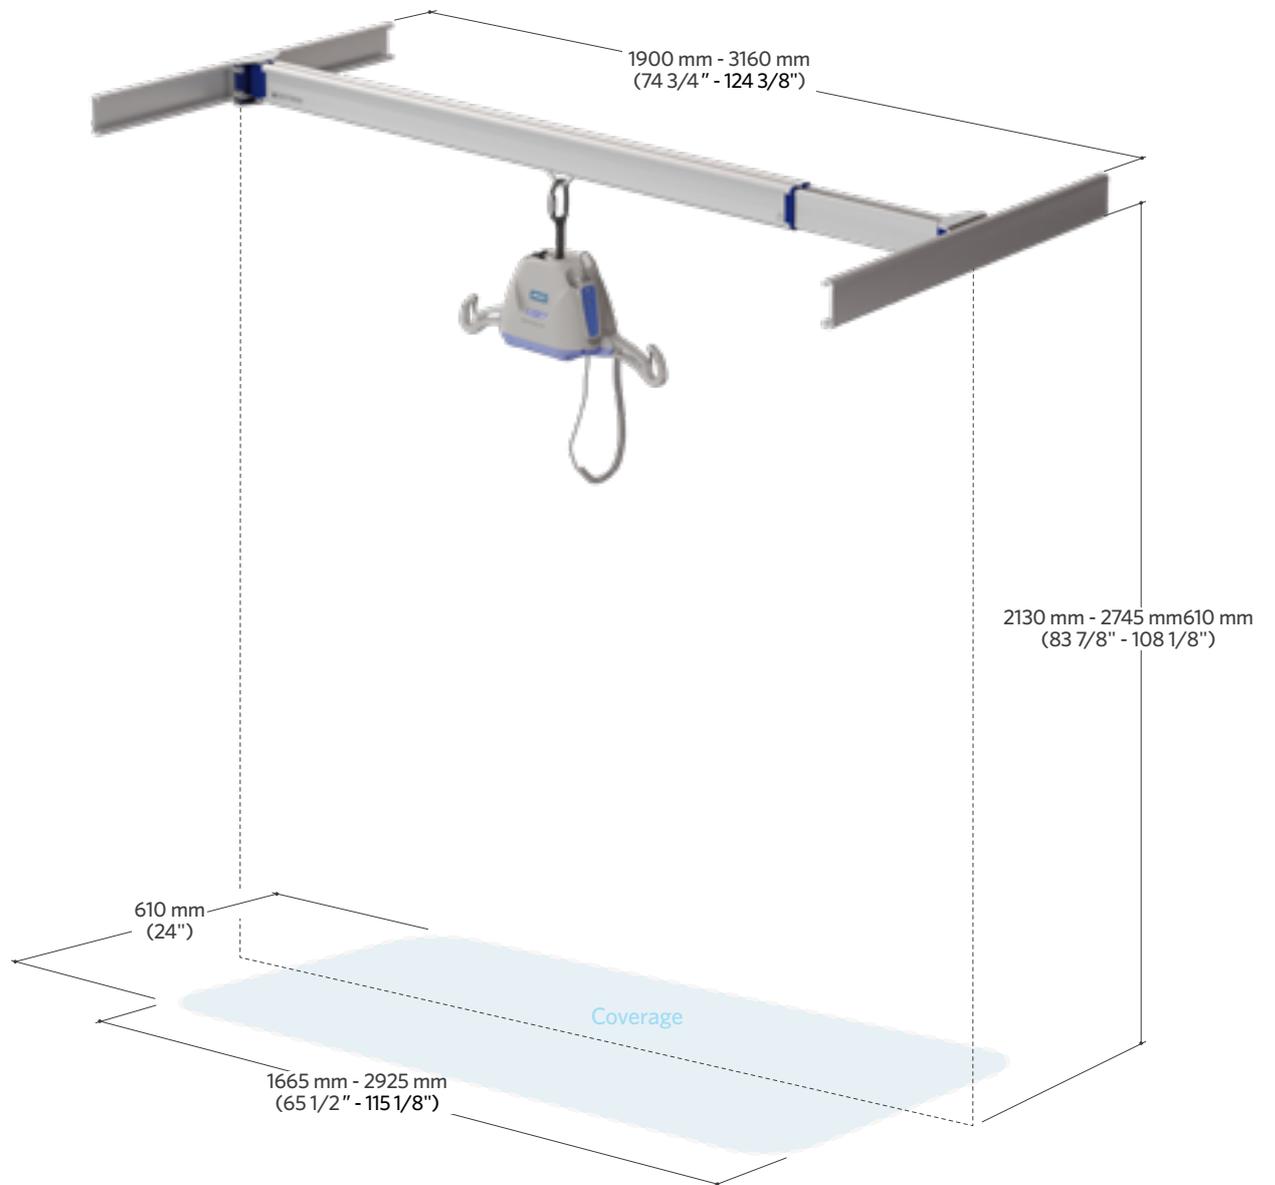

GENERAL	
Lifting capacity	200 kg (440 lb)
Weight	42.5 kg (93.5 lb)
Material	Aluminium
Ceiling plate	510 mm (20")
Floor plate	120 mm (4.8")
Compliant with:	ISO 10535:2006

COMMON PARTS

ARTICLE #	DESCRIPTION
1 9202010	Easytrack - 2 wall brackets
2 700.10750	Extendable track 3000 mm (118") & trolley
3 000.03280	Allen key 6mm
4 700.10860	Wall bracket kit - 1000 mm (39")
5 700.10720	Extendable track 1300-1900 mm (52-75") & trolley
6 002.10450	Easytrack transport bag
7 700-08310	Reacher - 610 mm (24")
7 700-08320	Reacher - 910 mm (36")

PRODUCT DIMENSION

Easytrack 3 wall brackets

Wall mounting system combined at three locations with pivoting track, for portable ceiling lifts

USAGE EXAMPLE

Ceiling not suitable for a pressure fit mounting ?

Easytrack can also be fastened to the wall in various configurations like this three wall brackets system with a pivoting 2nd track for greater room covering.

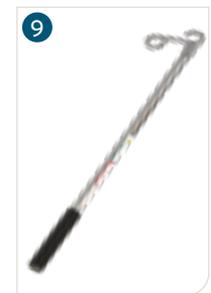

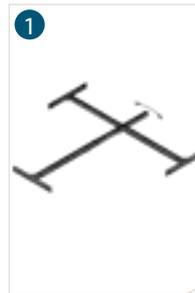

PRODUCT INFORMATION

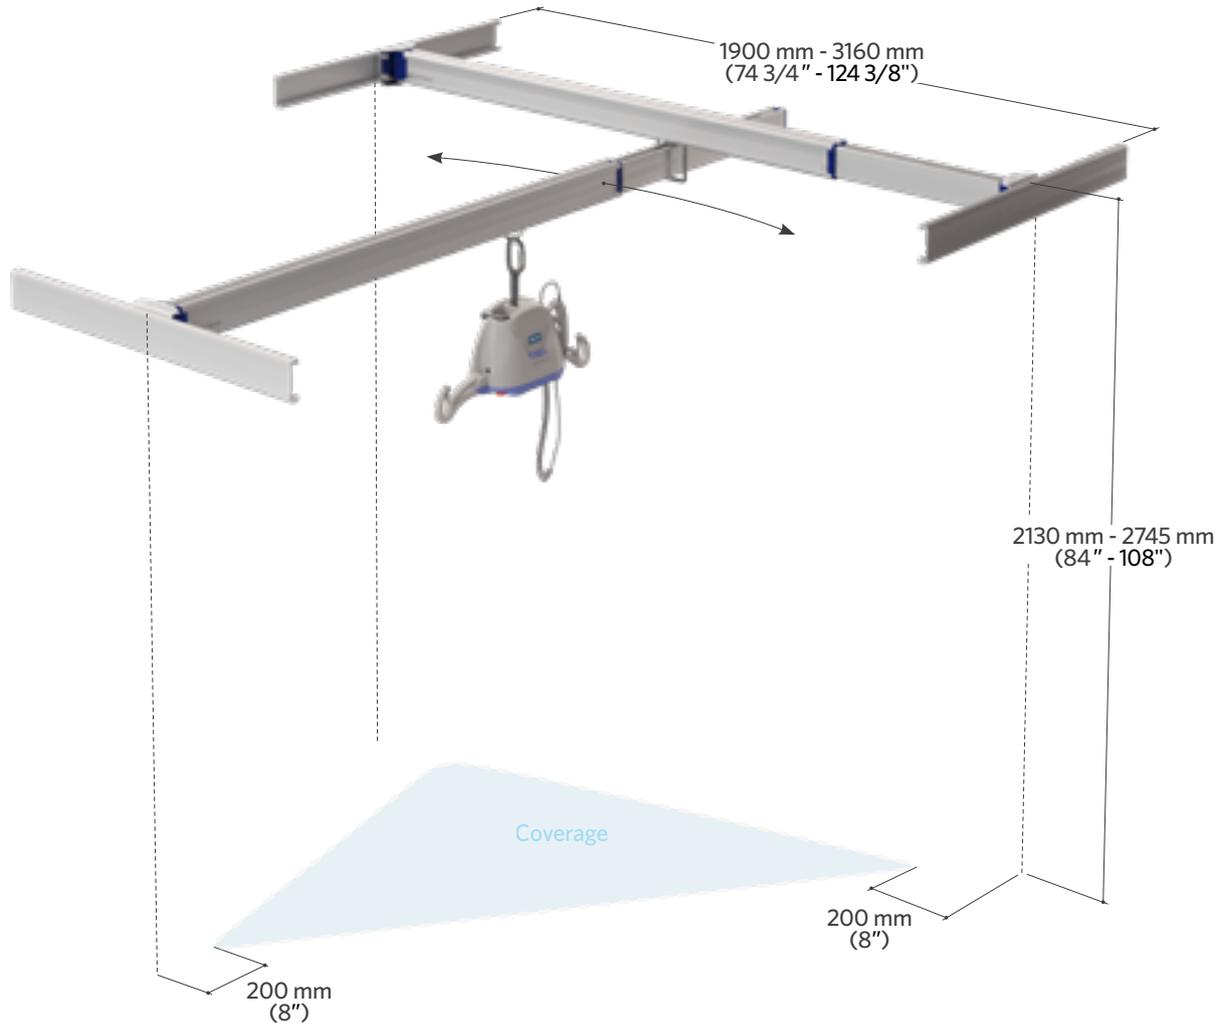

GENERAL	
Lifting capacity	200 kg (440 lb)
Weight	42.5 kg (93.5 lb)
Material	Aluminium
Ceiling plate	510 mm (20")
Floor plate	120 mm (4.8")
Compliant with:	ISO 10535:2006

COMMON PARTS

ARTICLE #	DESCRIPTION
1 9303010	Easytrack - 3 wall brackets
2 700.10850	Pivoting extendable track 3000 mm (118") & trolley
3 700.10800	Extendable track 3000 mm (118") & swivel trolley
4 700.10860	Wall bracket kit - 1000 mm (39")
5 700.10720	Extendable track 1300-1900 mm (52-75") & trolley
6 002.10450	Easytrack transport bag
7 000.03280	Allen key 6mm
8 700.11005	KWIKtrak autolock track stopper
9 700-08310	Reacher - 610 mm (24")
9 700-08320	Reacher - 910 mm (36")

PRODUCT DIMENSION

Easytrack 1 post with wall bracket

Pressure fit system with wall bracket combined with one post, for portable ceiling lifts

USAGE EXAMPLE

This combination allows to securely anchor a wall bracket on one side and a pressure fitted post on the other where anchoring is not possible.

Other versatile options are available such as 3 post, 4 post, bath tub adaptor and wall bracket configurations

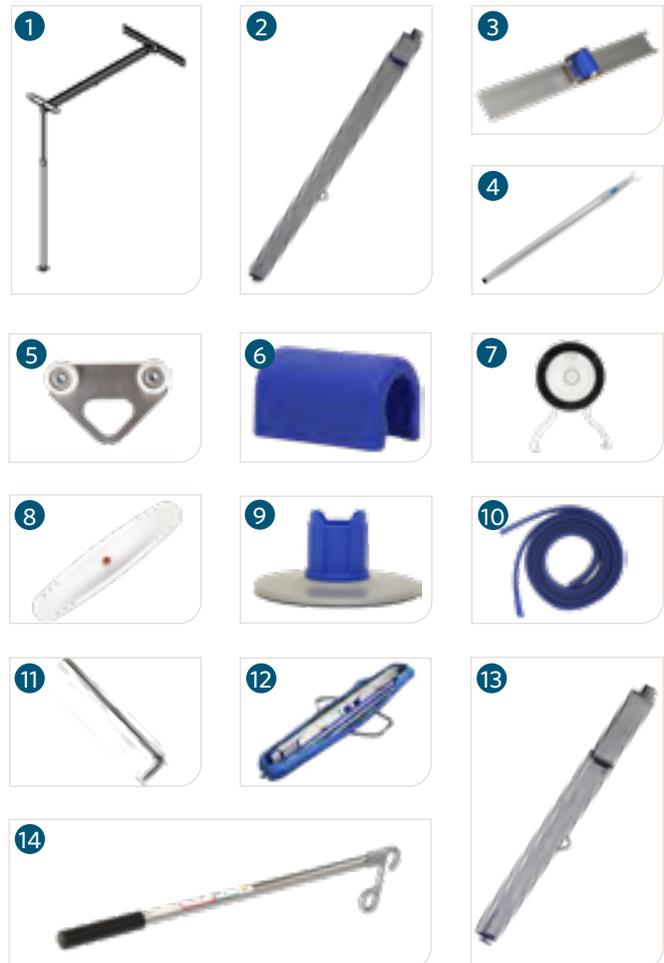

PRODUCT INFORMATION

GENERAL	
Lifting capacity	200 kg (440 lb)
Weight	20 kg (44 lb)
Material	Aluminium
Ceiling plate	510 mm (20")
Floor plate	120 mm (4.8")
Compliant with:	ISO 10535:2006

COMMON PARTS

ARTICLE #	DESCRIPTION
1 9211010	Easytrack - 1 Post + 1 Wall bracket
2 700.10750	Extendable track 3000 mm (118") & trolley
3 700.10860	Wall bracket kit - 1000 mm (39")
4 700.10500	Standard post
5 700.10650	Trolley for portable lifts/Easytrack
6 200.10720	Round end cap
7 700.10600	Clip-on level
8 700.10400	Top plate for post
9 700.10350	Round foot plate for post
10 700.10230	Post strip (2 pieces)
11 000.03280	Allen key 6mm
11 203.02505	Allen key 4mm
12 002.10450	Easytrack transport bag
13 700.10720	Extendable track 1300-1900 mm (52-75") & trolley
14 700-08310	Reacher - 610 mm (24")
14 700-08320	Reacher - 910 mm (36")

PRODUCT DIMENSION

Easytrack 2 posts with wall bracket

Pressure fit system with wall bracket combined with two posts and pivoting track, for portable ceiling lifts.

USAGE EXAMPLE

The combination allows to securely anchor a wall bracket on one side and a pressure fitted posts on the other where anchoring is not possible.

Other versatile options are available such as 2 post, 3 post, 4 post and bath tub adaptor configurations.

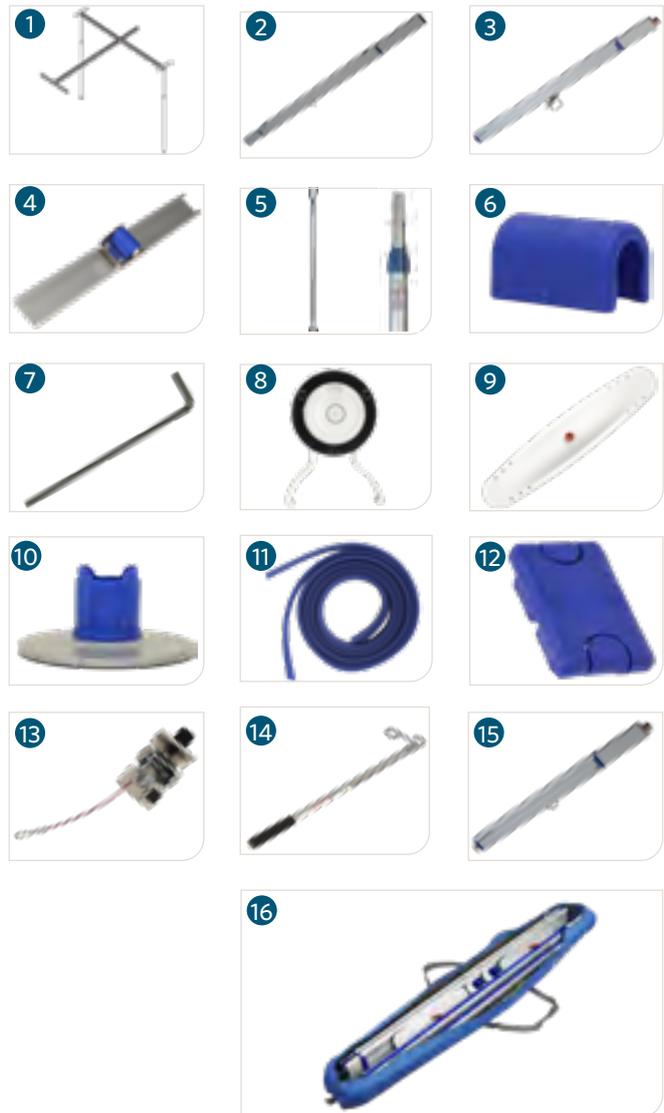

PRODUCT INFORMATION

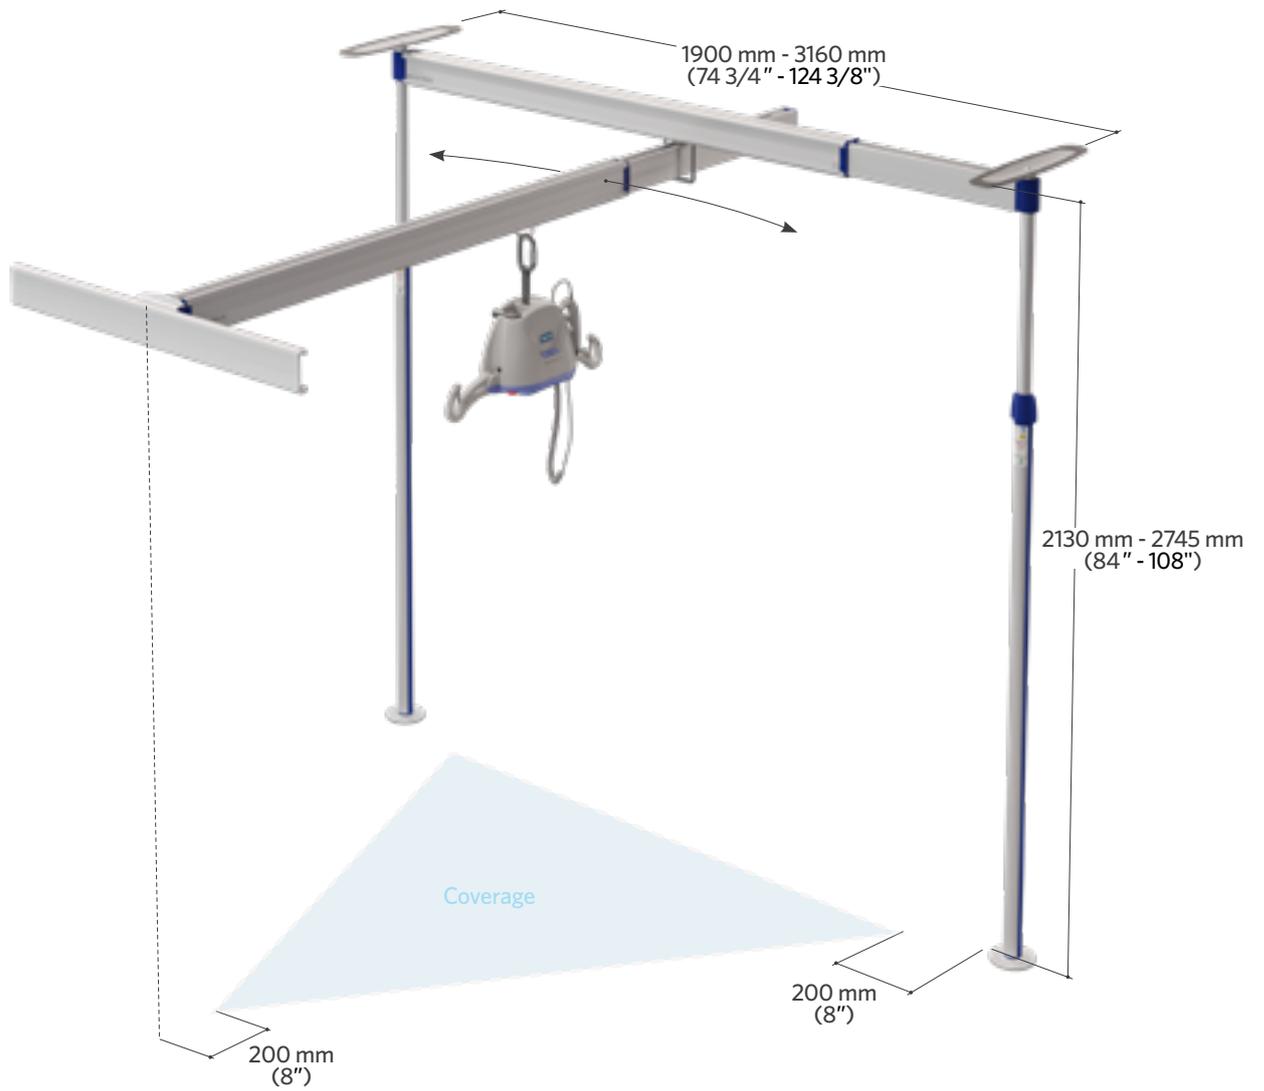

GENERAL	
Lifting capacity	200 kg (440 lb)
Weight	42.5 kg (93.5 lb)

Privacy curtain solutions

Page intentionally left blank

Swivel pole for curtain

Systems for privacy and for separation of areas

PART NUMBERS

	ARTICLE #	DESCRIPTION
1	700.12000	Swivel pole for curtain (Curtain not included)
2	700.12032	Ceiling bracket for curtain pole
	200.11460	Extrusion 2,2 m (55" x 90") White

PRODUCT DIMENSION

Miscellaneous

Wall hooks

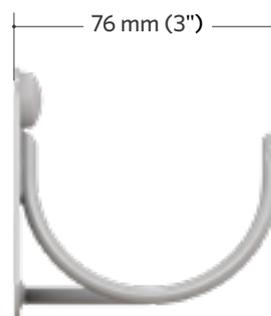

This storage system keeps the equipment close at hand while reducing space requirements.

PART NUMBERS

ARTICLE #	DESCRIPTION
1 700-05959	Wall support kit (including 4 wall protective plates)
2 200-05952	Wall protective plate (1 pc)

PRODUCT DIMENSION

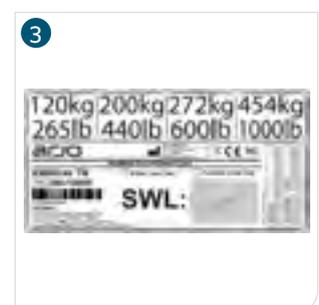

Weight load test

This set of weights makes it possible to verify that each installation of tracks meets the standards for load support.

PART NUMBERS

	ARTICLE #	DESCRIPTION
1	700.12560	Empty trolley - for Load Test
2	700.12530	Trolley + 11 discs/272kg (600 lb)
2	700.12500	Trolley + 14 discs/340kg (750 lb)
3	001.12725.33	SWL label for track

Appendix

Portal for architects and planners

We've talked to architects across the globe to find out more about their process, and how we can support them. The result is the online Arjo Guide for Architects and Planners.

Global experience at a local level

Since 1957, we have been driven by a mission to improve quality of life for people affected by reduced mobility and age-related health challenges.

With products and solutions that ensure ergonomic patient handling, personal hygiene, disinfection, and the prevention of pressure injury and venous thromboembolism, we help professionals across care environments to continually raise the standard of safe and dignified care. Today, we are recognized as a global partner, providing products and services to over 100 countries worldwide.

Your partner in facility design

We have a long history of collaborating closely with architects, nursing home executives, safe patient handling experts, residents and relatives. Our experience has taught us that to create efficient care facilities and to obtain a good working environment, the right combination of environment, equipment and care skills are needed. Therefore it is key to design for sufficient space early in the planning of a new facility

Optimising care facilities

Planning a care facility is about planning for the future, and will impact both the efficiency and quality of care and the work environment for the caregivers.

We base our work on our Positive Eight™ philosophy and starts with the combination of environment, equipment and care skills.

We have also developed The Mobility Gallery™, a validated risk assessment tool based on five personas and their levels of functional mobility

The importance of right space

Our experience has taught us that to create efficient care facilities and to obtain a good working environment, equipment and care skills are needed.

Therefore it is key to design for sufficient space early in the planning of a new facility.

BIM objects

Dozens of 3D BIM Revit format files are available for download, ready for use.

How to access it ?

All architects and people from Arjo can request an access, here:

<https://www.Arjo.com/int/solutions/architects-and-planners/>

Metric conversions and equivalents

The Metric Conversion Act of 1975, as amended by the Omnibus Trade and Competitiveness Act of 1988, establishes the SI (System International) metric system as the preferred system of measurement in the United States for trade and commerce.

Many products are currently manufactured and supplied in SI or “hard” metric sizes such as anchor bolts of 10 mm, 12 mm, etc. Where the inch-pound system is given or used, “soft” metric conversion can sometimes be used (but specifically not when selecting critical to only use the specified Imperial or Metric diameter bit).

The soft conversion diameters for anchor bolts is given by Table 1. Standard metric conversion factors commonly used for fastening products are given in Tables 2 & 3.

TABLE 1 - SOFT CONVERSION DIAMETERS

IMPERIAL SYSTEM	HARD METRIC	SOFT METRIC
Inch	mm	mm
1/4	6.35	6
5/16	7.94	8
3/8	9.52	10
1/2	12.70	12
5/8	15.88	16
3/4	19.05	20
1	25.40	25
1-1/4	31.75	32

TABLE 2 - IMPERIAL TO METRIC

TO CONVERT	INTO	MULTIPLY BY

Glossary

TERMS/ACRONYMS/SYMBOLS	DESCRIPTION
MISCELLANEOUS	
Augmented Reality (AR)	Augmented Reality is an interactive experience of a real-world environment where the objects that reside in the real world are enhanced by computer-generated perceptual information, sometimes across multiple sensory modalities, including visual, auditory, haptic, somatosensory and olfactory.
Brake force	Force required to stop a moving lift
Infection Control	Infection control is the discipline concerned with preventing nosocomial or healthcare-associated infection.
QR Code	QR codes are two-dimensional barcodes, they often contain data for a locator, identifier, or tracker that points to a website, an application or in this case Augmented Reality models
Rolling force	Force required to push the lift and maintaining its movement
Start force	Force required to push the lift and make it move
SWL	Safe Working Load (SWL) is the maximum safe force that a piece of lifting equipment, lifting device or accessory can exert to lift, suspend, or lower, a given mass without fear of breaking.
	These symbols show the available sizes for the corresponding slings
	Washable sling
	Wipeable sling
	Disposable sling
STANDARDS	
AAMI	The AAMI standards program consists of over 100 technical committees and working groups that produce Standards, Recommended Practices, and Technical Information Reports for medical devices. Standards and Recommended Practices represent a national consensus and many have been approved by the American National Standards Institute (ANSI) as American National Standards.
ANSI	The American National Standards Institute (ANSI) is a private non-profit organization that oversees the development of voluntary consensus standards for products, services, processes, systems, and personnel in the United States.[3] The organization also coordinates U.S. standards with international standards so that American products can be used worldwide.
DSDC	DSDC is the world leader on the design of services and environments for people with dementia.
IEC 60601	60601 is a widely accepted benchmark for medical electrical equipment and compliance with IEC60601-1 has become a requirement for the commercialisation of electrical medical equipment in many countries.
IEC 60601-1	Requirements of 60601-1 may be overridden or bypassed by specific language in the standards for a particular product.
IP24	Protected against solid objects over 12 mm (e.g. fingers) and against water sprayed from all directions - limited ingress permitted
IPX4	Protection against water sprayed from all directions - limited ingress permitted
IPX7	Protected against the effect of immersion between 15 cm and 1 m
IPX24	Protection against direct sprays of water up to 15° from the vertical and against an impact of 2.0 joules (e.g. 500 g weight falling from 40 cm height)
ISO 10535	ISO 10535 specifies requirements and test methods only for hoists and body-support units intended for the transfer of disabled persons as classified in ISO 9999. The requirements of ISO 10535 are formulated with regard to the needs of both the disabled persons being hoisted and the attendant using the hoist.
Type BF	IEC 60601-1 uses the term applied part to refer to the part of the medical device which come into physical contact with the patient in order for the device to carry out its intended function.. Type BF is generally for devices that have conductive contact with the patient, or having medium or long term contact with the patient.
UL 2601-1	this Standard is primarily concerned with safety, it contains some requirements regarding reliable operation where this is connected with safety.
